POWERPRO® CONCRETE SCREW ANCHORS

We've engineered the best performing code approved Concrete Screw Anchor for fastening into concrete, wood, and masonry materials. This new addition to the PowerPro lineup provides quality installations, dependable strength, an engineered design, and the confidence of building code approvals.

- ✓ Removable
- ✓ Patented design
- ✓ Drives fast and easy
- ✓ Recommended for interior & exterior projects
- ✓ Can use a standard ANSI drill bit for installation
- ✓ 25% greater pullout values vs. competition
- ✓ 50% greater corrosion protection vs. competition

BASE MATERIALS

BUILDING CODE APPROVED

- ICC ESR Concrete ESR 4340
- ICC ESR Masonry ESR 4339
- ICC ESR Chemically Treated Wood ESR 4357
- AC257 Treated Lumber Certified
- Miami Dade County Product Control in Progress
- Florida Building Code Approved
- California Building Code Approved

Corrosion Protection

- Epoxy coated and 410 stainless steel options available

Superior Strength Thread Design

- **Wide Serrated Threads** cut fast, easy & clean thread paths in concrete. Provides strong pullout & shear loads
- **Mid-Crossband Threads** provide drive stability and help break up & act as an exhaust port for concrete dust

NEW Star Drive

- 6 contact points spread out torque for no strip installs
- Exclusive to flat head screws
- Pro-Stik™ Driver Bits included with Pro Packs

Length Identification

- Letter code length identification on head for post installation inspection

Underhead Micro-Nibs

- Help flat head screws cut a clean countersink in wood

High Strength

- Manufactured from heat treated carbon steel for strength & durability

Threaded to Tip

- No more chisel point concrete screws!
- Designed to quickly self-drill & penetrate wood

SUPERIOR CORROSION PROTECTION

Epoxy Coating

Organic based multi layer coating system provides superior corrosion protection in treated lumber and outdoor application.

- Outperforms competition in salt spray testing
 - 50+% greater protection vs. competition
- Surpasses 1,500 hours of harsh testing
- Certified for use in exposure conditions 1 through 4 (reference ESR 4357 for detailed information)
- AC257 treated lumber certified

0 Salt Spray Hours
