Questions, problems, missing parts? Before returning to your retailer, call our customer service department at **1-800-486-4892**, 8:30 a.m. - 5 p.m., CST, Monday - Friday.

PACKAGE CONTENTS

PART	DESCRIPTION	QUANTITY
A	Fixture	1
B	Shade (preassembled to Fixture (A))	1
C	Mounting Strap	1

HARDWARE CONTENTS (shown actual size)

SAFETY INFORMATION

READ AND SAVE THESE INSTRUCTIONS.

DANGER

- For your protection and safety, carefully read and understand the information provided in this manual completely before attempting to assemble, install or operate this product. Failure to do so could lead to electrical shock, fire or other injuries that could be hazardous or even fatal.
- DO NOT connect this fixture to an electrical system that does not provide a means for equipment grounding. Never use a fixture in a two-wire system that is not grounded. Installing a fixture into an electrical system not having a proper grounding means could cause metal parts of the fixture to carry electrical currents if any of the fixture wires, wire connections or splices were to become broken, cut or loose during the mounting or normal operation of the fixture. Under this condition, anyone coming in contact with the fixture would be subject to electrical shock, which could cause serious injury or death.

SAFETY INFORMATION

- DO NOT connect the bare or green insulation fixture ground wire to the black (HOT) current-carrying wire or the white (NEUTRAL) house wire. Connection of the bare or green fixture ground wire to the black or white house wires may cause metal parts of the fixture to carry electrical currents. Under this condition, anyone coming in contact with the fixture will receive electrical shock, which could cause serious injury or death.
- DO NOT damage or cut the wire insulation (covering) during installation of fixture. DO NOT permit wires to contact any surface having a sharp edge. To do so may damage or cut the wire insulation, which could cause serious injury or death from electrical shock.

WARNING

- All electrical connections must be in agreement with local codes and ordinances, the National Electric Code (NEC) and ANSI/NFPA 70-1999. Contact your municipal building department to learn about your local codes, permits and/or inspections. Risk of fire - most dwellings built before 1985 have supply wire rated for 140°F (60 °C). Consult a qualified electrician before installation.
- To avoid personal injury, the use of gloves may be necessary while handling fixture parts with sharp edges.
- DO NOT suspend any fixture by the house wires. A fixture must always be mounted directly to an outlet box or to a mounting strap that is first attached to the outlet box. Wire connectors will not support the weight of a fixture. Suspending a fixture by the house wires and wire connectors will result in the fixture falling, with the possibility of personal injury and the danger of electrical shock or fire.
- To reduce the risk of fire, electrical shock or personal injury, wire connectors provided with this light fixture are designed to accept only one 12-gauge house wire and two lead wires from the light fixture. If your house wire is larger than 12-gauge or there is more than one house wire to connect to the corresponding fixture lead wires, consult an electrician for the proper size wire connectors to use.

CAUTION

- TURN OFF ELECTRICITY at main fuse box (or circuit breaker box) before beginning installation by removing the fuse (or switching the circuit breaker off).
- If you are not sure the lighting system has a grounding means, DO NOT attempt to install this fixture. Contact a qualified, licensed electrician for information regarding the proper grounding methods as required by the local electrical code in your area.
- All fixtures must be mounted to an outlet box that is supported by the building structure.
- If a dimmer control switch is used with this fixture, obtain professional advice to determine the correct type to use as well as the electrical rating required.
- Do NOT tamper with or attempt to repair LED component of fixture. The light source is designed for this specific application and should not be serviced by untrained personnel. If any servicing is required, call our customer service department.

PREPARATION

Before beginning assembly of product, make sure all parts are present. Compare parts with package contents list and hardware contents list. If any part is missing or damaged, do not attempt to assemble the product.

Estimated Assembly Time: 15 minutes

Tools Required for Assembly (not included): Flathead Screwdriver, Phillips Screwdriver, Wire Strippers, Pliers, Wire Cutters, Safety Glasses, Stepladder, Electrical Tape

Helpful Tools (not included): A/C Tester Light, Do-It-Yourself Guide, Soft Cloth

ASSEMBLY INSTRUCTIONS

1. Turn off circuit breakers and wall switch to the fixture supply line leads.

⚠ DANGER: Failure to disconnect power supply prior to installation may result in serious injury or death.

2. Remove existing fixture and disconnect all electrical wiring.

ASSEMBLY INSTRUCTIONS

3. Turn shade (B) to the left (counterclockwise) to remove from fixture (A).

4. To mount the fixture directly to an outlet box (not included), insert fixture screws (BB) two full turns into screw holes in the outlet box.

NOTE: If the holes in the fixture do not align with holes in the existing outlet box, proceed to Step 5a to install the fixture with the mounting strap (C).

Hardware Used

BB Fixture Screw  x 2

- 5a. To mount the fixture with the mounting strap (C), insert fixture screws (BB) two full turns into screw holes on the mounting strap (C).

Hardware Used

BB Fixture Screw  x 2

ASSEMBLY INSTRUCTIONS

- 5b. Attach mounting strap (C) to outlet box (not included) using existing washers and outlet box screws or the machine screws (CC). **NOTE:** If the outlet box screws required for your outlet box are of a different size than the machine screws (CC), consult a licensed electrician before proceeding. Tighten machine screws (CC) to secure mounting strap (C).

⚠ CAUTION: Make sure the outlet box can support 35 lbs. hanging weight. Use *metal* outlet box; plastic outlet boxes are not recommended.

Hardware Used

NOTE: The drawings in Figs. 6 - 8 are applicable for mounting options 4, 5a and 5b.

6. Prepare wires by stripping 3/4 in. of insulation from wire ends using wire strippers (not included). Connect WHITE wire from fixture (A) to WHITE wire from outlet box using existing wire connector or wire connector (AA). Connect BLACK wire from fixture (A) to BLACK wire from outlet box using existing wire connector or wire connector (AA). Connect BARE/GREEN ground wire from outlet box to GREEN ground wire from fixture (A) with wire connector (AA).

NOTE: Screw wire connectors (AA) on in a clockwise direction.

⚠ WARNING: Never connect ground wire to WHITE or BLACK power supply wires.

⚠ WARNING: To reduce the risk of fire, electrical shock or personal injury, wire connectors (AA) are designed to accept only one 12-gauge house wire and two lead wires from the light fixture. If your house wire is larger than 12-gauge or there is more than one house wire to connect to the corresponding fixture lead wires, consult an electrician for the proper size wire connectors to use.

Hardware Used

ASSEMBLY INSTRUCTIONS

7. Wrap electrical tape (not included) around each individual wire connector (AA) down to the wire.

⚠ WARNING: Make sure no bare wire or wire strands are visible after making connections.

Carefully arrange excess wiring and wire connectors (AA) within outlet box.

8. Align keyslot holes on fixture (A) with fixture screws (BB) and push up. Secure fixture (A) to mounting strap (C) by tightening the fixture screws (BB).

Hardware Used

BB Fixture Screw  x 2

9. Align three tabs on shade (B) with three slots on fixture (A) and twist shade (B) to the right (clockwise) until it stops.

Restore power and test fixture (A).

If fixture does not function, please refer to TROUBLESHOOTING on next page.

CARE AND MAINTENANCE

- Shut off main power supply. Wipe with soft cloth or use window cleaner. Do not use an abrasive cleaner.

TROUBLESHOOTING

⚠ WARNING: Before beginning work, shut off the power supply to avoid electrical shock.

WARRANTY

CRAFTMADE warrants all of its lighting fixtures against defects in materials and workmanship for one (1) year* from the date of purchase. If within this period the product is found to be defective, take a copy of the bill of sale as a proof of purchase and the product in its original carton to the place of purchase. CRAFTMADE will, at its option, repair, replace or refund the purchase price to the consumer. All costs of installation and removal of the fixture is the responsibility of the consumer. This warranty does not cover fixtures becoming defective due to misuse, accidental damage or improper handling and/or installation and specifically excludes liability for direct, incidental or consequential damages, improper packaging of returned products and acts of God. As some states do not allow exclusions of limitations on an implied warranty, the above exclusion and limitation may not apply. This warranty gives you specific rights and you may also have other rights which may vary from state to state.

* LED component warranty is five (5) years.
