LIMITED WARRANTY INFORMATION

Thank you for choosing an Alpine product! We aim to please with our wide range of products including Fountains, Birdbaths, Statuary, Pond Supplies & More. All of our products are constructed from the highest quality materials. In the event that we have not achieved our usual standard of excellence, we will repair or replace, at our discretion, within the warranty period. A valid proof of purchase, with the purchase date clearly indicated, must be provided. Photos of defective merchandise will also be required to help distinguish the actual cause of the defect. Please read below for a detailed description of warranty coverage.

- **Water Damage**

Alpine products are not manufactured to withstand extreme temperatures. Improper storage that allows water to freeze within a product may cause damage, is considered negligence, and will not be covered under this warranty. The use of "hard water," and/or caustic cleaners, can affect the painted or other finishes. Failure to keep the unit clean, and use of such additives/cleaners, will also void the warranty. Please note: for fountains, it is normal for some splashing to occur and protecting the immediate surfaces is not the responsibility of Alpine Corporation.

- **Paint & Color (Retention and/or Loss)**

The use of water will cause natural erosion to the color. This area can be touched up using standard paint. The paint is designed to protect the entire finish against breakdown of color. As with any product, all finishes with time will gradually fade and discolor. The warranty will only cover against severe or complete fading, within the first year from date of purchase, with the above exclusion.

- **Procedure/Service**

Should a warranty/claim be needed, you should contact the retailer from whom you purchased the product. If that is not an option, you can contact Alpine Corporation at www.alpine4u.com. When contacting Alpine Corporation, you must be prepared to show proof of purchase, provide photographs and any other information needed to validate your claim. This may be necessary to distinguish between a partial or complete replacement of a defective product. The warranty does not cover any items with multiple parts; the warranty will ONLY cover the individual component of the unit/item that may be defective. Replacement parts can be made available to a consumer through the original selling party, or an approved parts retailer. If this is not an option, contact our customer service department. **Item is covered under one year limited warranty from the date of purchase. When requesting replacement parts due to a warranty claim after 30 days of purchase, credit card information will be requested for shipping charges.**

- **Not Covered Under Warranty**

The limited warranty will NOT cover cases of damages due to:

1. Damages caused in Transit
2. Inadequate care and/or neglect
3. Environmental and/or natural elements
4. Immersion in water, unless specified
5. Improper Installation/Storage and/or Maintenance

This warranty is void if the product has been damaged by accident, misuse, negligence, improper installation and/or modifications have occurred. This includes any and/or all defects arising out of freezing water damage, hard water damage, failure to keep the unit clean and free of harmful additives such as bleach, chlorine, etc.... which affects the paint and/or parts. This warranty also does not cover any additional charges or installation, removal, disposal and/or shipping costs or consequential damage associated with any warranty claim.

SOLAR PANEL INSTRUCTIONS

Place or insert the solar panel's stake into the ground nearby. Press the power button once to turn the Solar Panel **ON**.

Note: Make sure to adjust the panel making a 45 degree angle facing in the direction that captures the most sun throughout the day.

Cloudy days or shorter winter days will reduce the amount that the unit will be charged. The orientation of the solar panel will affect the performance of the light. The solar panel should face the center of the range of sunlight.

Solar Panel Guide:

1. Solar Panel's Battery Box:

Uses four (4) Ni-MH 1.2V1500mah rechargeable batteries.

2. Charging Light:

Turns red while the solar panel is charging.

Turns green when batteries are fully charged.

3. Working Light:

Red light turns on when panel is in use.

4. Power Button:

Switch the panel's power **On** and **Off**.

3. From the back opening of the fountain check the vinyl tubing connection from inside the fountain into the water pump, then place the pump back into the fountain.

4. Gently pour water into the fountain basin, being careful not to overflow and cause splashing. Make sure the water completely submerges the pump and the water runs clear during operation.

NOTE: We recommend that you use distilled water to prevent scale build-up. The first time you operate the pump it can take up to 5 minutes for the air to be completely expelled and water begins to flow properly

5. Plug the pump and light cords into the back of the Solar panel as shown below. First plug the pump into the left outlet labeled (6) "Pump". Next plug the light cord into the right outlet labeled (7) "Light".

Solar Panel Close-Up

6. You can now adjust the water pump to your flow preference. (see Quick Tip #1) Once set, install the Back-Door Cover by sliding it into the designated opening.

Alpine Quick Tip #2

Make sure your pump and light cords are tucked neatly into the cord slot.

7. Congratulations, your fountain is now complete. Don't forget to add water regularly as water will evaporate over time.

Relax and enjoy your new fountain.

ASSEMBLING & USING YOUR PRODUCT

Unpack all components carefully. Please check to ensure all parts have been removed from the packaging. **Some splashing may occur when the product is in use.*

1. Place the fountain base on a smooth & level surface. Allow enough space to access the pump.

2. Remove the pump from the packaging and adjust the flow control to the lowest setting to avoid splashing until the fountain is completely assembled.

Alpine Quick Tip #1

Switch to the Left / to turn down the water flow.
Switch the adjuster to the Right / to turn up the water flow.

TROUBLESHOOTING

If you have any questions and/or problems, please contact the retail store you purchased this fountain.

• If your pump fails to run

- Check the circuit breaker or try a different outlet to make sure the pump is receiving electrical power.
- Check the pump discharge and tubing for any kinks and/or obstructions
- Any buildup obstructing the water flow can be flushed with a garden hose
- Check the rotor by removing the front cover & plate to access the impeller area. Turn the rotor and make sure that the rotor is not jammed or broken

• If your pump “spews”

- Check the water level to make sure the pump is completely submerged and there is enough water in the basin to operate your fountain. Not having enough water will cause your pump to spew

• If your pump is making abnormal loud noises

- Disconnect the pump from the electrical power supply and remove the front cover & plate
- Carefully grip the impeller and gently pull the impeller/rotor assembly out of the pump housing
- Rinse the impeller/rotor assembly and clean the cavity with clean water. If breakage or damage is found, contact your local retailer for parts.

CAUTION

- Always unplug the pump from the electrical outlet before cleaning or handling it.
- Use with clean water only. Do not place the fountain and/or its parts in any other liquid.
- Periodically change the water and clean the pump to keep it free of microorganisms.
- During freezing weather, or during a period of time of no use, disconnect the fountain and store it in a dry place.
- Do not lift, carry, or pull the pump by the power cord.
- **NEVER LET THE PUMP RUN DRY.**

FEATURES

- Flowing water adds a soothing sound to any environment

- Made of lightweight, durable materials.

- LED lights in the basin of this fountain are long-lasting, energy-efficient, and creates a stunning nighttime display
