

SEAM KIT

INSTALLATION INSTRUCTIONS

For use with 3-inch Redi2Set glass block

The Seam Kit is used to join together two Redi2Set Glass block windows to make one larger window.

- Includes a 3 in. x 32 in. (actual size: 2 5/8 in. x 31 1/2 in.) spacer and a tube of REDI2BOND glass block silicone
- Not for projects over 25 sq. ft.
- For use only with 3 in. thick REDI2SET glass block windows
- Made in the USA

STEP 1:

Measure and cut spacer to size

Spacer

STEP 2:

Silicone top and bottom edges of spacer and join together two window panels

STEP 3:

Run a bead of silicone on the outside joints of both sides of the panel

*Also squeeze a small dab of silicone in the space where the corners of the block meet

Tip: For a professional look, tool the silicone joints by using the rounded edge of a plastic spoon
