

5-in-1 Pine Wood Barn Door - Frame

Installation Manual

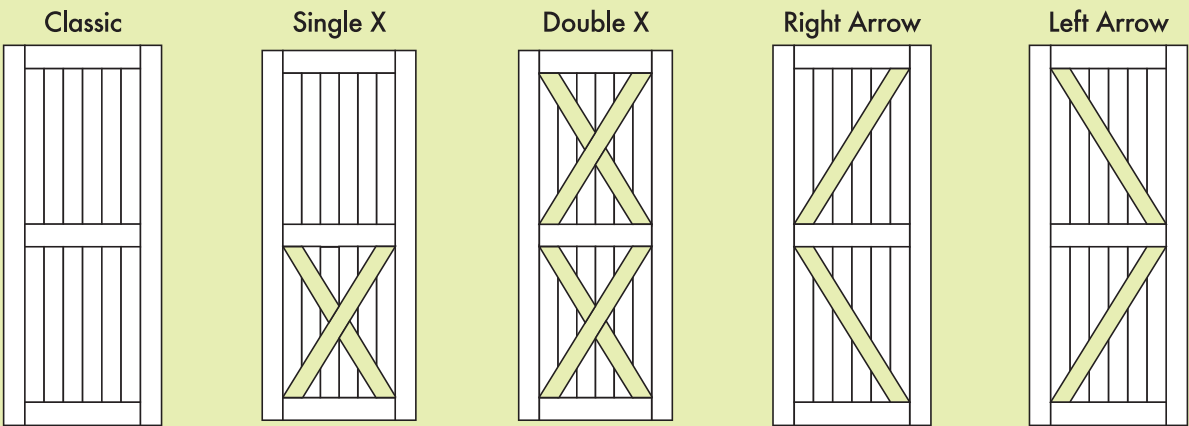

SAFETY PRECAUTIONS

!CAUTION!

- Power tools can cause serious damage if not professionally used. Safety gear must be worn before installation to prevent unexpected injuries.
- Pick an area free of hazardous condition before you start on the project. Please use tools and power tools responsibly any loss of control and accident deaths may occur due to abuse of tools.
- Big objects required in this project are needed to be carefully and responsibly moved. Be sure to wear safety gloves and shoes to prevent any serious injury.
- Be extremely careful to not put any parts of your body against a moving part of the hardware. This may cause bruising, punctures, and other results of injuries when for example when fingers are caught in the closing area of the doors.
- Precautions should be taken when opening or closing the door(s). Handles should be used when attempting to slide the door(s). Always keep you and children aware and safe from any unexpected situations.
- Any extreme uncontrolled pressure opening or closing the door(s) can damage the hardware gradually. Use handle(s) to open and close the door(s) with care at all times.

Door Design	D1	D2	H1	H2
Classic	0	0	0	0
Single X	1	1	2	2
Double X	2	2	4	4
Left Arrow	2	2	0	0
Right Arrow	2	2	0	0

INSTRUCTIONS

WARNING

If you purchased any of our Sliding Barn Door Hardware Kit to accommodate with this door please do not install the long bolts on the first hole. This will interfere with the installation of the rollers. You may cover up the hole with the wooden dowels given only. Having one screw installed for the top horizontal slab will not interfere with the stability of the door, having wood glue used in the process of putting the slabs together will help to secure them in place.

ON YOUR OWN PREFERENCE

You may fill in the extra holes left from the dowels with wood glue or cut down the dowels that is sticking out of the door after installing. Then sand off to smoothen the sides and the whole door to prepare for the finishes need for your door. This will help to make the sides of the door flawless and help camouflage the predrilled holes.

If you want the classic design, your installation is complete!

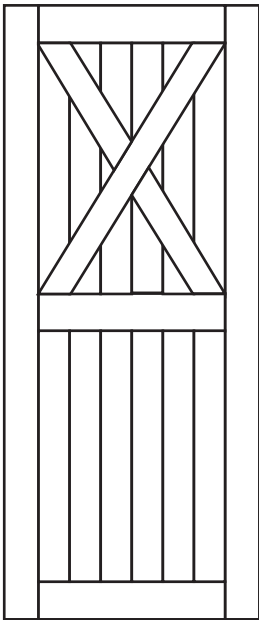

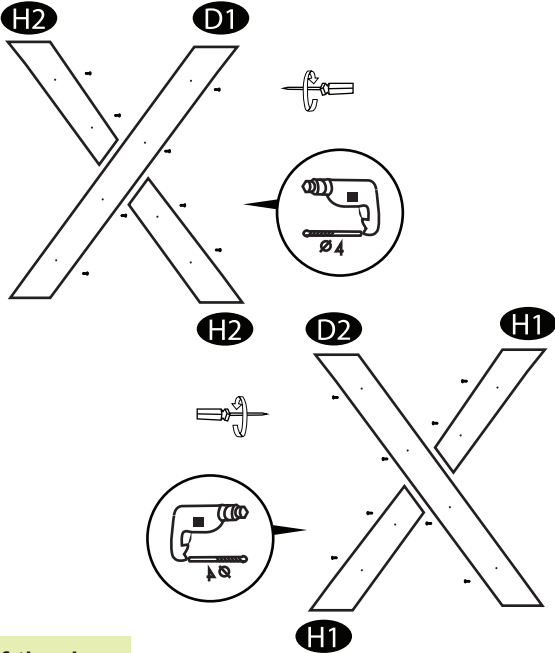

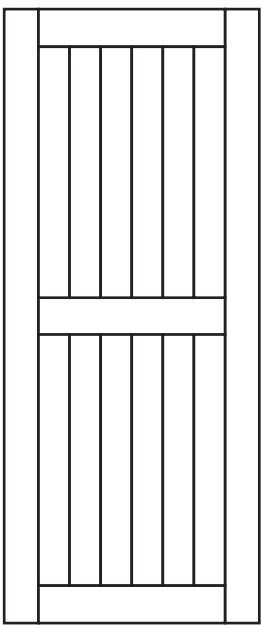

NOTICE

But if you want to build other designs besides the classic please continue to page 5.

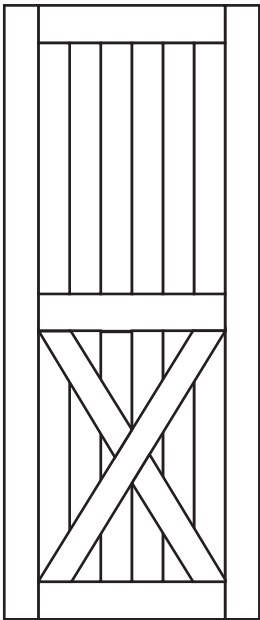

Before Installing the decorative panels make sure to differentiate the top and the bottom of the door(s). That way you can place the panels, and position it in the desired design.

Single X Door Design

Follow the diagram below by using the screws included.

TOP

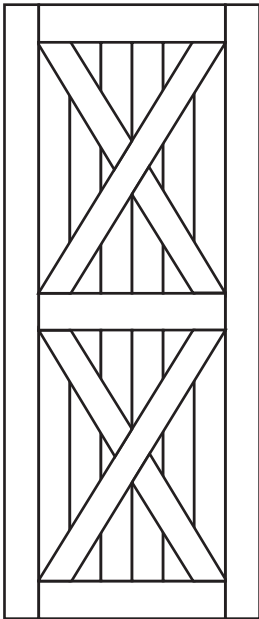

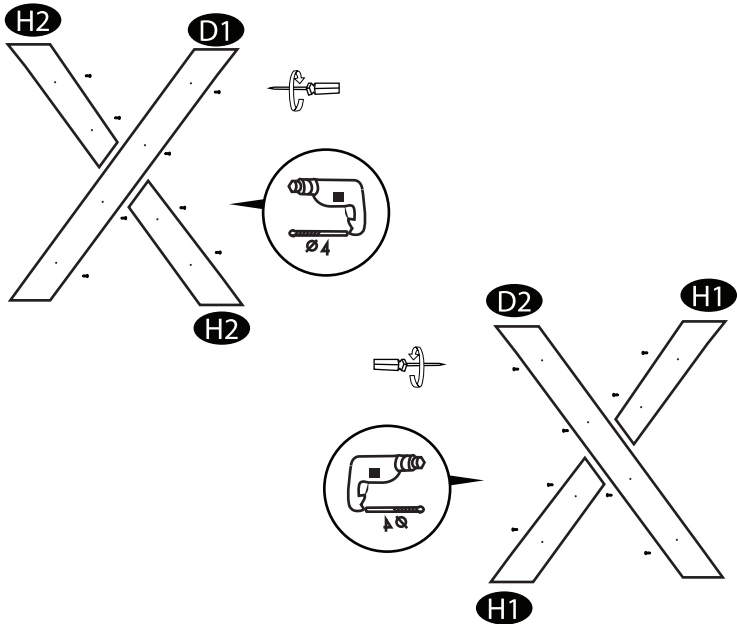

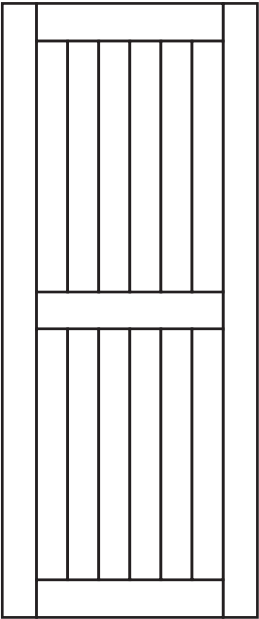

BOTTOM

Do this for both sides of the door.

Double X Door Design

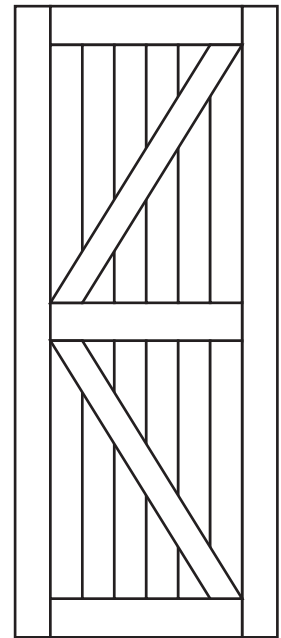

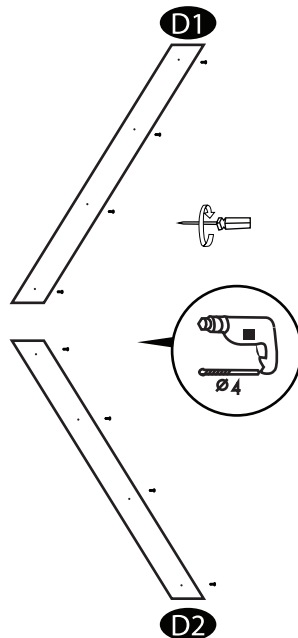

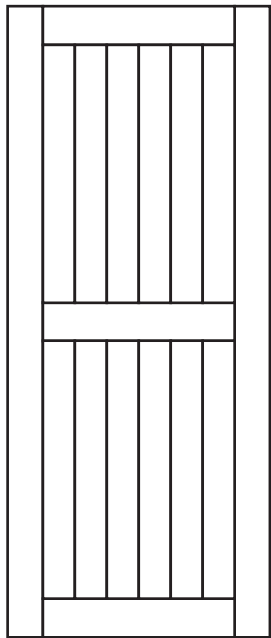

Follow the diagram below by using the screws included.

Do this for both sides of the door.

Left Arrow Door Design
