

LEVEL BRACKET

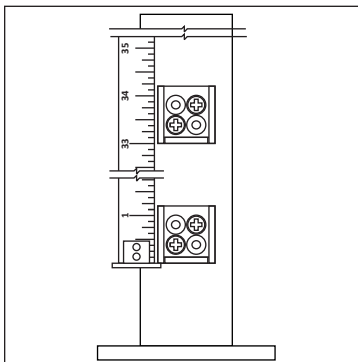

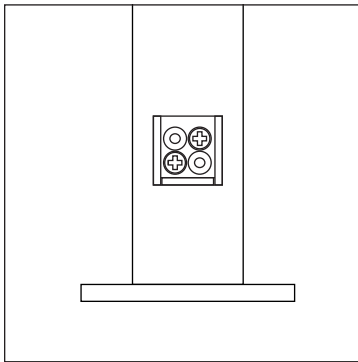

INSTALLATION INSTRUCTIONS

LEVEL BRACKET INSTALLATION

1. Install Bottom Bracket:

- From the top of the base plate, mark a line at 1-5/8". This is the bottom edge of the Reliabilt Level Bracket.
- Mark the desired center line of the installed rail panel where it intersects the top bracket line.
- Position the bracket with the notch facing the center line marking.
- Secure the bracket using two fasteners suitable for your mounting surface material. Install the fasteners diagonal from each other.

2. Install Top Bracket:

- Locate the bottom bracket you attached in step 1.
- 34" Panel Installation:
 1. Measure 33" [864mm] from the bottom of the bottom bracket. Mark this point on the post.
- 40" Panel Installation:
 2. Measure 39" [991mm] from the bottom of the bottom bracket. Mark this point on the post.
- Mark the desired center line of the installed rail panel where it intersects the top bracket line.
- Attach the top bracket using the same method as the bottom bracket in step 1.
