## VIVANTE™ LINEAR SHOWER DRAINS TECHNICAL SPECIFICATION

### DESCRIPTION

Oatey vivante™ shower pan drains shall be used in residential and commercial applications when connecting to a DWV system. The drain body is constructed of durable and corrosion resistant 304-grade stainless steel with pre-sloped channels to ensure proper water evacuation. Drain height can be modified using the adjustable leveling feet (linear drains only). The 2-inch PVC outlet adaptor threads into a compatible PVC or ABS drain base. Strainer shall meet all necessary load and flow requirements for installations in shower areas. Drain kit includes a stainless steel debris basket and cover removal tool.

PVC or ABS Drain Base – Sold separately. The countersunk holes are used to secure the flange base to the subfloor with an approved fastener. The shower pan drain shall have a solvent weld connection over 2" Sch. 40 DWV hub connection or inside 3" Sch. 40 which conforms to ASTM D2665 (PVC) or D2661 (ABS). Base accepts 130 series 1/4 Turn Test Plug, which holds 40 ft of head pressure. Clamp collar ring fastens by use of hex bolts that thread into brass inserts and has improved weep holes and channels, which can be inverted to achieve an additional 1" in finished height. Drain base accepts 2 in. threaded adapter connected to stainless steel drain body.

### FEATURES AND MATERIALS

- 304 grade stainless steel drain body
- 304 grade stainless steel cover
- 2 in PVC threaded adapter
- Cover removal tool
- 304 grade stainless steel debris basket

### APPROVALS AND LISTINGS

- Uniform Plumbing Code
- International Plumbing Code
- National Plumbing Code of Canada
- ASME A112.18.2-2020 / CSAB125.2-20
