

# **Rustic Cream White Metal Pails Fountain**

# Assembling & Using Your Product

Unpack all components carefully. Check the packaging to ensure that you have removed all of the parts. Some splashing may occur when the product is in use.

## Components

- A Fountain Topper
- B Fountain Bucket Base
- C Submersible Pump

## Assembly

1. Place the Fountain Bucket Base (B) on a smooth and level surface. (① in the diagram)
2. Remove the Submersible Pump (C) from its packaging and slide the flow control to the left (the lowest setting) to avoid splashing. (② in the diagram)
3. Insert the short tube on the Submersible Pump (C) into the vinyl tubing running from the underside of the Fountain Topper (A). Pass the power cord through the notch next to the water pipe. (③ in the diagram)
4. Lower the Fountain Topper (A), with the pump attached, into the Fountain Bucket Base (B). Do not pinch the power cord! (④ in the diagram)
5. Without splashing, gently pour water into the Fountain Bucket Base (B) until it is half-way full. Using distilled water prevents scale build-up. Do not allow water to overflow! Make sure the water completely covers the Submersible Pump (C). (⑤ in the diagram)
6. Plug the pump's power cord into your 120V local power supply. (⑥ in the diagram) Make sure that there is no water around the plug and always keep the power source in a dry place.
  - NOTE: The first time you operate the pump, it can take up to 5 minutes for the air to be completely expelled and water to begin to flow properly.
7. Make sure the water runs clear during operation. (not shown in the diagram)
8. Adjust the flow control slider to your desired flow. (⑧ in the diagram)

## Troubleshooting & Caution

If you have any questions or problems, please contact the retail store where you purchased this fountain.

- **If your pump fails to run**
  1. Check the circuit breaker or try a different outlet to make sure the pump is receiving electrical power.
  2. Check the pump discharge and tubing for any kinks and/or obstructions.
  3. Check for any buildup obstructing the water flow and flush it with a garden hose.
  4. Check the rotor by removing the front cover and plate to access the impeller area, then turn the rotor to make sure that it is not jammed or broken.
- **If your pump “spews”**
  - Check the water level to make sure the pump is completely submerged and there is enough water in the basin to operate your fountain. Not having enough water will cause your pump to spew.
- **If your pump is abnormally loud**
  1. Disconnect the pump from the electrical power supply and remove the front cover and plate.
  2. Carefully grip the impeller and gently pull the impeller/rotor assembly out of the pump housing.
  3. Rinse the impeller/rotor assembly and clean the cavity with clean water. If breakage or damage is found, contact your local retailer for parts.
- **Fountain Care**
  - We recommend using Alpine Item PPL102’s all-natural cleansing formula to eliminate foam, lime scale, and calcium buildup; fight mineral deposits; leave water crystal clear; help prevent staining; remove organic contaminants; and treat discolored water. This formula will help prevent pump damage due to hard water build up.  
For more information, please visit [www.alpine4u.com](http://www.alpine4u.com).

### Cautions

- **Always unplug the pump from the electrical outlet before cleaning or handling.**
- **Use with clean water only. Do not place the fountain and/or parts in any other liquid.**
- **Periodically change the water and clean the pump to keep the fountain free of microorganisms.**
- **If the fountain will not be used for an extended period, disconnect it and store it in a dry place.**
- **Do not operate with water above 90°F/30°C.**
- **Do not lift, carry, or pull the pump by the power cord.**
- **Do not exceed the maximum voltage and wattage listed on the pump.**
- **NEVER LET THE PUMP RUN DRY.**

# Limited Warranty Information

Thank you for choosing an Alpine product! We aim to please with our wide range of products including Fountains, Birdbaths, Statuary, Pond Supplies, and more. All of our products are constructed from the highest quality materials. In the event that we have not achieved our usual standard of excellence, we will repair or replace your product, at our discretion, within the warranty period. A valid proof of purchase, with the purchase date clearly indicated, must be provided. Photos of defective merchandise will also be required to help distinguish the actual cause of the defect. Please read below for a detailed description of warranty coverage.

- **Water Damage**

Alpine products are not manufactured to withstand extreme temperatures. Improper storage that allows water to freeze within a product may cause damage and is considered negligence and will, therefore not be covered under this warranty. The use of “hard water” and/or caustic cleaners can affect the paint or other finishes. Failure to keep the unit clean, and use of such additives/cleaners, will also void the warranty. Please note: for fountains, it is normal for some splashing to occur and protecting the immediate surfaces is not the responsibility of Alpine Corporation.

- **Paint & Color (Retention and/or Loss)**

The use of water will cause natural erosion to the color. This area can be touched up using standard paint. The paint is designed to protect the entire finish against breakdown of color. As with any product, all finishes with time will gradually fade and discolor. The warranty will only cover against severe or complete fading within the first year from date of purchase with the above exclusions.

- **Procedure/Service**

Should a warranty claim be needed, contact the retailer from whom you purchased the product. If that is not an option, you can contact Alpine Corporation at [www.alpine4u.com](http://www.alpine4u.com). When contacting Alpine Corporation, you must be prepared to show proof of purchase and provide photographs and any other information needed to validate your claim. This may be necessary to distinguish between a partial or complete replacement of a defective product. The warranty does not cover any items with multiple parts; the warranty will **ONLY** cover the individual component of the unit/item that may be defective. Replacement parts can be made available to a consumer through the original selling party, or an approved parts retailer. If this is not an option, contact our customer service department. Item is covered under a [two-year limited warranty](#) from the date of purchase. When requesting replacement parts due to a warranty claim after 30 days of purchase, credit card information will be requested for shipping charges.

- **Not Covered Under Warranty**

The limited warranty will NOT cover cases of damages due to

1. Inadequate care and/or neglect
2. Environmental and/or natural elements
3. Immersion in water, unless specified
4. Improper Installation/Storage and/or Maintenance

*This warranty is void if the product has been damaged by accident, misuse, negligence, improper installation, and/or if modifications have occurred. This includes any and/or all defects arising out of freezing water damage, hard water damage, and failure to keep the unit clean and free of harmful additives such as bleach, chlorine, etc., which affect the paint and/or parts. This warranty also does not cover any additional charges for installation, removal, disposal, and/or shipping costs or consequential damage associated with any warranty claim.*
