VOLT® Low Voltage Landscape Lighting

VOLT® LOWTR-100W-SS

PRODUCT DESCRIPTION

This 100W transformer designed for use with low voltage landscape lighting fixtures. With a maximum capacity of the full 100W, only one transformer is necessary to power most LED landscape lighting systems. It can be mounted on any flat surface using the screw hole at the top of the transformer, or a stake and riser assembly can be installed to the threading at the transformer's base for ground-level mounting. Connecting wires to this transformer is extremely simple, as the clamp-connect terminals can be open and shut with the lift of a lever. It includes a built-in timer and photocell, allowing the transformer to automatically turn on and off based on the amount of light it perceives.

PRODUCT DIMENSIONS

FEATURES & BENEFITS

- 100W maximum capacity
- Built-in timer and photocell
- Can be wall- or stake-mounted
- Designed for use in outdoor environments

SPECIFICATIONS

- **Construction:** Stainless Steel
- **Input Voltage:** 120V 60Hz
- **Maximum Draw:** 100W
- **Voltage Taps:** 15V

WARRANTY

Lifetime Warranty
