LIMITED GROWTH & FLOWERING GUARANTEE

Garden State Bulb Co. (GSB) products are grown with the utmost care and are of excellent quality. For best results, follow the instructions included. Because our flower bulbs are natural products, we offer a 1 Year Limited Growth and Flowering Guarantee.

GSB's obligation under this Guarantee is limited to troubleshooting, replacing the product or missing pieces, or providing a gift certificate at GSB's discretion. All products for which a Guarantee claim is made must be received by GSB with sufficient proof of purchase.

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow instructions, improper maintenance, damage caused by acts of nature (wind, lightning, snow, water, ice), or damage caused by improper use of the products—all of the above voids the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

PLANTING & CARE INSTRUCTIONS

PLANTING TIME	Fall
BLOOM TIME	Mid Spring
LIGHT	Full Sun
SPACING	4-5" apart, (9 per sq. ft.)
DEPTH	Plant 5-6" deep
MATURE HEIGHT	20-22" tall
BENEFITS	Beautiful Cut Flowers

Soil Preparation

**Great gardens start with great soil!
Soil preparation is essential for successful gardening.**

Flower Bulbs grow best in loose, well-drained soil that is rich in organic material. To give your Bulbs a cozy home to grow in, start by removing weeds, rocks, and debris from your planting area.

Loosen the soil to a depth of 12" and mix in organic matter (peat moss, compost, manure, or a combination). Check your soil composition to determine which type of organic material to add. Preparing the soil helps prevent the bulb from rotting, and helps its roots access oxygen and nutrients in the soil. This is a crucial step to growing happy, healthy, beautiful plants.

NOTE: Store bulbs in a cool (40-70°) dry place with plenty of air circulation until ready to plant.

Bulb Planting Instructions

- 1 Plant tulip bulbs in the fall, before the first frost. The temperature outside should be approximately 65° or cooler.
- 2 Select a spot with full sun to partial shade, with well-drained soil.
- 3 Dig a hole 5-6" deep in loosened soil. Plant bulbs 4-5" apart, with pointy ends up.
- 4 Cover with soil and water well, so that the soil above the bulb settles.

Ongoing Tulip Care

Aftercare is an important and rewarding part of caring for your Tulip Flower Bulbs. If cared for properly, your tulips could return and bloom year after year. You could even divide your bulbs after a few years, planting more than you originally purchased!

As your tulips fade to yellow and the blooms drop, remove only the flower heads with pruning shears. Cut just below the base of the flower to prevent the tulips from creating a seed head. Allow the remaining foliage to die back naturally (usually another week) to absorb enough sunlight to produce energy for next year's bloom.

Remove the rest of the dead foliage to ground level. Every three to five years, you can dig up your Tulip Flower Bulbs and divide them. Dig carefully around the edges of the plant with a trowel to determine depth. Carefully lift them out-you should have a collection of bulbs, which you can gently separate with your hands. Replant your Tulip Bulbs right away and enjoy blooms the following spring.

FREQUENTLY ASKED QUESTIONS

Q. When should I plant tulip bulbs?

A. Tulips bulbs should be planted in the fall. The best time for planting is usually when the leaves have fallen off most deciduous trees, but it has not yet snowed and the ground is not yet frozen.

Q. How do you store tulip bulbs after the leaves die back?

A. Dry the bulbs for a few days in a cool dry spot. Trim off dried stems, and roots. Place the tulip bulbs into ventilated mesh or string net storage bags, taking care to discard any offset bulbs that show rot such as dark spots or soft mushy areas. Store the bulbs in a cool (65°F) dry and well-ventilated space until it's time for fall planting.

Q. How long do tulips bloom?

A. Tulips typically bloom for 1 to 2 weeks.
