

Lighting Maintenance Kits

- *All in one solution kit for your lighting needs:*
 - Installations
 - Repairs
- *Contains PowerPlug® Luminaire Disconnects to ensure all ballast changes meet NEC/CEC code requirements*
- *Kits also contain 72B® and 73B® Wire-Nut® Wire Connectors for use on class 2 or low-voltage connections inside plenums, ducts and other environmental air handling spaces*

Lighting Maintenance Kits

Kits include the Wire-Nut® Wire Connectors. This American-classic wire connector is the original connector that started it all. The Wire-Nut® Wire Connector has a ribbed shell that provides a positive grip along with a fixed square wire spring to ensure a secure connection.

Also included in both kits are our In-Sure™ Push-In Wire Connectors (Model 33). This connector offers an ergonomic push-in design for easy grip and comfort.

The PowerPlug® Luminaire Disconnects included in both kits fully meet the current National Electric Code and Canadian Electric Code for non-residential fluorescent luminaires. These disconnects are perfect for new, retrofit or OEM lighting installations and allow for safe disconnect of hot and neutral ballast wiring.

Lighting Maintenance Kit Includes plastic case and the following:

Model 72B®	Blue Wire-Nut® Wire Connectors	25/each
Model 73B®	Orange Wire-Nut® Wire Connectors	25/each
