UNDERSTANDING YOUR RAIL

INSTALLATION

Using a pencil, mark the locations where you will drill holes as indicated.

Using a power drill with a 4mm drill bit, drill holes as indicated.

Outwater Industries, Inc. assumes no liability for improper installation.

Install the rail, mounting brackets [E], and door stops [C].

NOTE: Door stops [C] are installed on the outermost holes of the rail and shares the same mounting hardware [E].

Drill holes into the doors as indicated. Attach the roller straps [A].

It is suggested that the roller straps [A] be mounted 5" from the edge of the doors to the neck of the roller straps.

NOTE: Trimming the rail will alter the position of the roller hardware. Adjust accordingly.

FOR $\frac{3}{4}$ " DOORS

FOR 1" DOORS

Allow a minimum 3-1/8" clearance above the doors.

Outwater Industries, Inc. assumes no liability for improper installation.

Attach the anti-jump disks [B] to the doors.

Attach the doors to the rail [L] and lock the anti-jump disks [B] into position. Doors should be routed beforehand if using the routed door guides [G].

If using the routed door guides [G], install them at this time. Repeat steps 3-6 for additional door.

Use the hole covers [K] to give the rail a finished look.

The rail can be trimmed if necessary using a band saw or hacksaw. Use blades suitable for iron or stainless steel depending on your rail.

NOTE: If you are trimming the rail, do so equally. Each rail can be trimmed equally up to 3" on both sides. However; trimming will alter the position of the roller hardware. Adjust accordingly.

Once cut, add the end caps [D] to the ends of the rail and secure with a set screw.
