FISHER

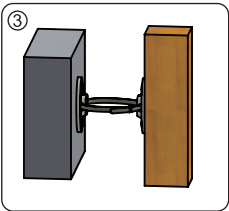

1
Attach 2 of the brackets (HW2) to the wall by inserting the fishers (HW4) into the wall and using the screws (HW1) to attach the brackets (HW2). The drawing to the left shows in red where the brackets should be placed on the mirror.

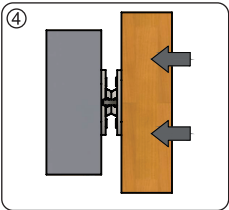

2
Attach the remaining brackets (HW2) to the back of the mirror by using the screws (HW1) to attach them. They should line up with the brackets on the wall.

3
Thread the strap (HW3) through the loops on the 2 brackets (HW2) as shown. Tighten the strap until its snug. Repeat for the 2 brackets on the other side of the mirror.

4
Make sure all brackets are firmly attached to the wall and to the mirror. Make sure the straps are snug.
