

## ➤ Application

- |   |  |  |
|---|--|--|
| 1 |  | Empty completely all the contents of the catalyst (B) onto the paste (A).  |
| 2 |  | Mix at slow speed using an electric drill equipped with mixing paddle. Scrape the walls of the bucket to eliminate all parts of non-catalysed product.   |
| 3 |  | The joints must be dry. Introduce the mortar into the joints using the suitable green rubber float (art. 946GR) spreading diagonally across the joints. Remove the excess product.   |
| 4 |  | The grout must be cleaned while the product is still wet. Sprinkle clean water. Initial cleaning using a moistened white felt (art. 109/GB) making circular movements. Ensure no water enters the joints. Any adjustments to the grout must be performed before cleaning with water. |
| 5 |  | Now perform a second cleaning with a rigid cellulose sponge (art. 128G0001).   |
| 6 |  | Any stains of the transparent product can be removed after 24 hours or anyway after the gap has hardened. Use HAZE REMOVER. Spread HAZE REMOVER with the white felt.   |
| 7 |  | Leave on for 15-30 minutes. Scrub the surface with the white felt.   |
| 8 |  | Rinse with clean water. Dry immediately with a clean cloth and do not wait for the evaporation of the rinse water.   |

Mixture life: About 1 hour at T= +23°C / 73,4°F

Application temperature: from +12°C to +30°C / From + 64,4°F to 73,4°F

Recommended application temperature: from +18°C to +23°C / From 64,4°F to 73,4°F

Walkable after: 24 hours at T= +23°C / 73,4°F

Ready for use: 5 days at T= +23°C / 73,4°F

Storage time: 24 months in original packaging, avoid freezing temperatures.

Packaging: 1, 2.5 and 5 kg buckets

Mixing ratios: Component A: 93.7 parts by weight - Component B: 6.3 parts by weight -

The two components are pre-measured in their respective packaging

Consistency of the mix: creamy grout

Specific gravity of mix: 1.55 kg/l

Joint width: Up to 3 mm
