

Hose filter

Advanced Water Treatment

Instructions:

1. Flush garden hose before use to remove contaminants
2. Remove and save caps for storage (do not allow filter to dry out)
3. Attach filter and flush for one minute until water runs clear
4. For highly contaminated water, reduce flow rate
5. If flow rate slows, back-flush to remove clogging (see product documentation for complete instructions)

Suggested Uses:

- Hot Tub/Spa filling
- Pool Filling
- Gardens
- Ponds
- Fish Tanks
- Washing Vehicles

Solves Most Water Problems Caused by:

- Dissolved Heavy Metals (Does not remove manganese)
- Lime and Scale
- Organic Contaminants & VOCs
- Hydrogen Sulfide
