17	Flange	1

CLAWFOOT CONFIGURATION

Clawfeet: R-CFL03, R-CFL04, R-CFL06, R-CFL-20 have specific foot placement. Each foot in the set is unique. Inside each foot is labeled with a letter to help you find the proper location on the tub for installation. Match up the letters on the clawfeet with the letters on the underside of the tub. The letters on the tub will be the same as what are on the clawfeet and will match accordingly.

BATHTUB INSTALLATION

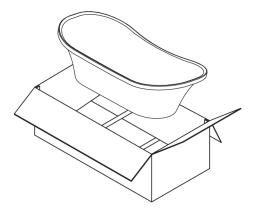

- Ensure that the floor at the installation site 1. has sufficient floor support and level.
- Waterproofing the floor is highly 2. recommended

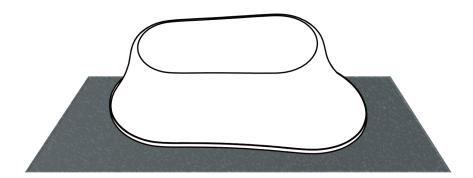

- 3. Determine the location of the drainpipe on the floor by taking measurement of the drain and waste location underneath the unit. Clean the drain hole area in preparation of setting the drain. The area should be dry & free from any debris.
- Remove the bathtub from its box. It is recommended that the bathtub is carried by a minimum of two people.

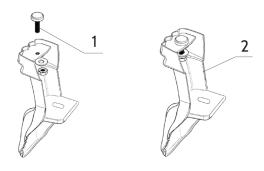

5. Gently place the bathtub in the upside-down position on a tarp or cardboard sheet in order to avoid contact with any rough surface.

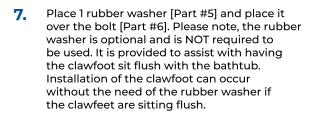

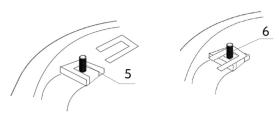

BATHTUB INSTALLATION

Take 1 adjustable foot [Part #1], place it through 6. the hole in the clawfoot [Part #2].

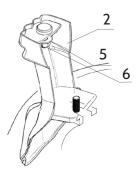

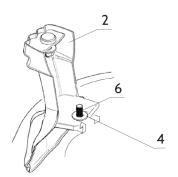

Take the clawfoot [Part #2] and place it over over the rubber washer [Part #5] and bolt [Part #6].

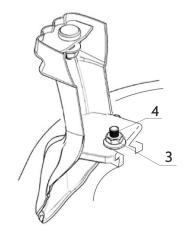

Take one washer [Part #4] and place it over the 9. clawfoot [Part #2] and bolt [Part #6].

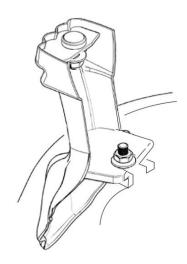

10. Take I nut [Part #3] and place it over the the washer [Part #4].

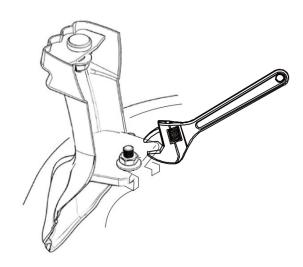

BATHTUB INSTALLATION

11. Make sure to adjust the clawfoot so that it fits snug with the bolts on the bathtub. This will help to ensure that the clawfeet are placed correctly and are functioning properly.

12. Tighten the nut [Part #3] with a wrench and adjust the clawfoot as needed. Repeat for the other 3 clawfeet.

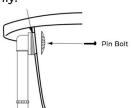

THE BELOW INSTRUCTIONS ARE FOR INSTALLING **DRAIN ASSEMBLY N-DWF-XX**

1. Take the overflow ell and unscrew the pin bolt, removing the overflow cover as well.

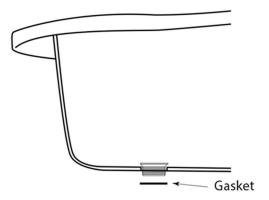

2. Take the tapered rubber gasket and the overflow ell and place it on the overflow hole on the back of the bathtub. Run the pin bolt with the overflow cover through the overflow hole and tighten firmly.

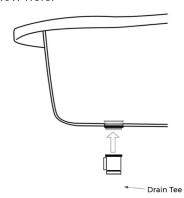

3. Remove the strainer from the drain tee. Take off 4. Take the lower gasket that was previously the larger, lower rubber gasket. Set it aside. DO NOT TAKE OFF THE SMALLER, UPPER GASKET. Place the strainer through the drain hole in the bathtub. Use silicone sealant to seal and ensure a tight connection. DO NOT use plumber's putty.

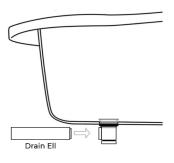

removed and re-attach it to the strainer from underneath the bathtub.

5. Screw on the drain tee to the bottom of the drain, making sure the opening of the drain tee is facing outwards to align with the overflow hole.

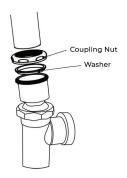

6. Insert the drain ell into the drain tee and screw in tightly. The use of threaded plumbing tape may be necessary at the joint to prevent leakage. This can be done at your discretion.

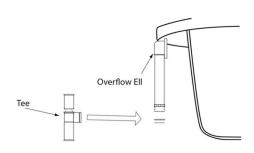

THE BELOW INSTRUCTIONS ARE FOR INSTALLING **DRAIN ASSEMBLY N-DWF-XX**

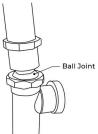

7. Remove the coupling nut and washer from the top of the tee where the ball joint is located.

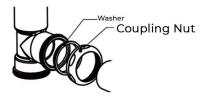

8. Connect the top of the ball joint tee with the overflow ell using the washer and coupling nut. Tighten firmly to have a leakless connection.

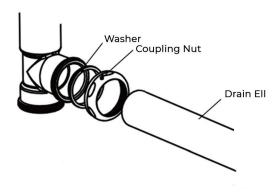

9. Use the ball and joint to angle the drain properly to allow for proper installation in the bathroom.

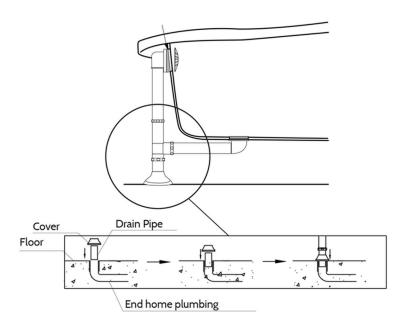

10. Remove the coupling nut and washer from the left-hand side of the drain tee.

11. Connect the drain ell with the left-hand side of the drain tee using the coupling nut and washer. Tighten firmly to have a leakless connection.

12. Attach the flange to the base of the external drain and proceed to connect the drain to the end home plumbing.

13. Prior to finalizing installation, check all drain connections and fill the bathtub with a minimal level of water to test and ensure that no connections are leaking.
