

Legs Assembly Instruction

Note 1 : James Martin recommends a minimum of two people for the assembly of the cabinet.

NOTE: Legs are located in special package inside the cabinet or inside the carton. Please look for these parts before discarding the original carton and packing materials.

Step 1: To attach the legs, place the vanity cabinet upside down on a blanket on similar soft material.

Step 2: Attached the feet by turning them to the “right” (clockwise) as shown in the diagram on the above.
