

KEY FEATURES

- 18" standoff
- Provides stability for work on extension ladder
- Easy access to gutters, downspouts and soffits
- Prevents damage against surfaces
- Compact and lightweight
- Meets compliance: OSHA 1926
- Product weight: 12 lbs.

The Ladder Stabilizer by Tie Down Safety improves ladder safety by keeping your ladder stable while accessing the roof or work site. It protects roofing, gutters, siding, and paint finishes by preventing the top of the ladder from leaning against the gutter, roof, or any surface. This extension ladder stabilizer is made of pre-galvanized steel and provides better stability and safety with any extension ladder. Ideal for painters, roofers, general contractors, and homeowners!
