

Clarion Laminates Use and Care Guide

- **Vacuum Regularly** - vacuum using a soft bristle brush attachment. Placing long bristle mats at all outside entrances is recommended.
- **Light Damp Mop** - laminate floors may be lightly damp mopped when needed. Avoid standing water as it may cause the joints between the planks to lift.
- **Use Floor Protectors on Furniture** – Furniture legs can scratch your floors. Any furniture that rests directly on top of a laminate floor should have floor protector or wide furniture coasters under all feet.
- **Don't Use Oil Soaps or wax-based cleaning products** – these products will leave a dull finish on your floor. Use a floor cleaner formulated for cleaning laminate flooring.
- **Trim Pets' Claws** – Pets' claws may scratch the surface if they are not trimmed regularly.
- **Wipe Spills Immediately** - when liquids get spilled on your laminate floor use a slightly damp white cloth, or paper towel to immediately blot up and dry the effected area. For more difficult spots, mix 1 gallon of water with 1 cup of vinegar or ½ cup of ammonia.
