

FLOOD PROTECTION

HELPS STOP FLOODWATER

No water penetration through 1/2" gaps at depths up to 3 feet, for 14 days.

When used in combination, and as directed, our Flood Protection Products have been independently verified by UL Solutions to hold back 3ft of water for 14 days on gaps up to 1/2 inch. Tested in laboratory settings.

BRING IT ON

Depending on age and type of construction, there may be areas that cannot be seen or sealed. For complete instructions, visit flexsealproducts.com/flood.

TAKE IT OFF

May leave residue or remove paint. Go to flexsealproducts.com/flood for removal instructions.

These revolutionary, new products are specifically designed to work together to create multiple layers of super-strong, waterproof protection, and to be easily removed after floodwaters recede. They can help slow down or even stop water from entering structures.

Patent Pending for Products and Uses.
