Overseeding 5 lbs / 1,000 sq ft

EN CUATRO PASOS SENCILLOS: Siga estas instrucciones para impresionar a sus vecinos

PARA RESIEMBRA O ZONAS DELGADAS: Corte el césped existente lo mas corto sea posible y elimine los desechos. Luego, rastrille la tierra para aflojar y suavizar la capa superior.

APLIQUE UN FERTILIZANTE: Aplique la cantidad de fertilizante recomendada por el fabricante

APLICACIÓN: Disemine las semillas de manera uniforme con un esparcidor de caída, rotativo o manual, de acuerdo con las configuraciones recomendadas y enumeradas del esparcidor. Rastrille suavemente para que las semillas y el fertilizante germinen en la tierra.

Keep the soil moist by watering daily as needed until grass sprouts and reaches about 3" tall.

Es muy importante que no utilice control de malezas en su césped hasta que el mismo haya alcanzado su máxima altura de corte de 3 pulgadas. ¡Esto podría matar a su césped!
