Position faucet on the installation surface. Fit flexible hoses through hole on countertop or sink.

Slide washer and thread the mounting nut onto threaded shroud. Turn faucet to desired handle position. Securely tighten clamp screws (E).

Connect pullout hose to quick connect and insert weight (loose-install).

Secure weight on lowest vertical point on pull-out hose side. (not on quick connect side).

Before connecting supply hose, flush supply valves to clear any debris. Place a bucket underneath valves and run water for 5 to 10 seconds. Turn water off.

Connect hot and cold water lines to the inlet pipe and tighten with a wrench until snug. Do not over tight.

Unscrew spray head by hand. Hold the tip of the spray hose down and turn on the faucet and let the water run 60 seconds to flush any debris, the re-connect spray head. Ensure gasket is present.

CARE AND CLEANING

Clean the faucet frequently using mild soap or an on-abrasive cleaner and then quickly rinse with water and dry with soft cloth only.

Using abrasive cleaners, solvents, acid cleaners or any scrubbing detergent, polisher or scraper will damage the finish and void the warranty.
