3-FUNCTION SHOWER SYSTEM

BEFORE YOU BEGIN

We recommend consulting a professional if you are unfamiliar with installing plumbing fixtures. Wellfor accepts no liability for any damage to the plumbing, floor, walls, tub, or for personal injury during installation.

Observe all local plumbing and building codes.

Unpack and inspect the item for shipping damage. If any damage is found, contact our Customer Relations team at 206.809.0093.

GETTING STARTED

Ensure that you have gathered all the required materials that are needed for the installation.

For the following installation instructions, it is assumed that the wall has been opened and that the existing shower set has been removed.

Before you begin, the main water supply to your home should be shut off.

INSTALLATION FEATURE

PRESSURE BALANCE VALVE PIPING

CONCEALED MOUNTING DEPTH

Note: Male thread is 1/2"-14NPT.

Installation depth for shower valve is between 82--102mm, including the thickness of the tile.
The shower valve opening size shall be smaller than the trim cover plate.

VALVE INSTALLATION

Note: Wood blocking should be installed between the two studs where the valve will mount. Be careful not to set the valve too far back into the wall. Use the sticker on the side of the valve for guidance.

Take off protective covers

Insert valve body with screws

Note: 1. Prior to removing the plastic protective cover, perform a water test to ensure there are no leaks.
2. After confirming that there are no leaks during the water test, promptly remove the valve plastic protective cover.
3. Slowly and carefully insert the copper valve body into the designated area, ensuring it is properly secured and fitted.

SHOWER HEAD INSTALLATION

Note: Wrap the threaded pipe of NPT1/2 with Teflon tape and screw it into the wall.
Test the functionality of the head shower. Check for any leaks.

Step1. Install the concealed pipe fitting.

Step2. cut out the stud wall.

Step3. Open the head shower cover.

Step4. Wrap plumbers tap around threaded fitting and screw them into concealed pipe fitting.

SHOWER HEAD INSTALLATION

Step5. Install the plate cover for head shower.

Step 6. Connect the head shower with concealed pipe fitting.

BODY JET INSTALLATION

Note: Wrap the threaded pipe of NPT 1/2 with Teflon tape and screw it into the wall.

INSTALL THE HAND SHOWER

Note: Test the functionality of the hand shower. Check for any leaks.

DIVERTER KNOB INSTALLATION

Note:

1. Take off protective cover on the valve, apply bead of quality sealant evenly along the back of metal plate.
2. Install the metal plate and diverter knobs step by step.
3. Install the handle and knobs with screw and screw caps.

SHOWER VALVE MAINTENANCE

Note: There are two flow regulator on the vlave, to repair or maintain the valve faucet, first turn off the diverter knob. Then, remove the panel and turn the flow regulating valves until the water line is shut off.
