BLOOMIN' EASY® LONICERA THUNDERBOLT® 4" POTTED ROCKETLINERS®

Rocketliners® are sized, shaped and rooted throughout the pot with strong and responsive roots. Gardeners can expect a healthy finished plant within a single growing season. They have greater fresh root mass and vertical root training which promotes faster finishing times. While it can often take up to 3 years for a shrub or vine to become fully established growing from bareroot, Rocketliners® may only take 12 months, saving you up to 2 seasons of waiting time. Rocketliners® are for gardeners that have busy lives, little time to waste and want to start out with the best planting stock.

*About This Variety:* Thunderbolt™ Box Honeysuckle (Lonicera nitida 'Golden Glow' USPP#26598) by Bloomin' Easy® produces beautiful chartreuse-green foliage and a dense, compact form making this new box honeysuckle a great choice for many landscape applications. You can plant it as a hedge and trim into a classic box form or use it as a feature in a mixed garden bed. Tolerates lots of shade, but will perform best in part sun conditions. Thunderbolt™ is a colorful improvement on a landscaper classic. Pollinator friendly and deer resistant.

*Growing Instructions:* Dig a hole two times the width of the liner pot. Set top of root ball even with ground level. Combine planting mix and garden soil. Fill to ground level and tamp down firmly. Water to settle soil. Add layer of mulch to retain moisture and discourage weeds. Water regularly for the first year, then as needed once established. Feed with a quality fertilizer following application and frequency instructions, typically just before and during the bloom season.

*Care Tip:* Thunderbolt® is a broadleaf evergreen (holds its leaves all year) preferred for its dense, colorful foliage and flexible use in the landscape. You can leave it to cascade naturally, trim lightly to keep a tidy form, or fully shape it into a hedge or topiary. The choice is yours. Be sure to prune when the threat of frost is over to avoid stress or severe damage to the plant.

*Blooms:* Spring

*Exposure:* Partial sun

*Height:* Grow 4-5' tall

*Spacing:* Plant 4-5' apart, setting root ball even with ground level

*USDA Zones:* Hardy in USDA zones 5-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
