Undermount Bathroom Sink

Undermount Bathroom Sink

THANK YOU

Safety Information

Before installing this sink, read this instruction manual carefully. It contains important information concerning the safe installation, operation, and maintenance of your sink. Retain this manual for future use. In the event of sale, transfer, or relocation, ensure this manual remains with the sink.

WARNING: Keep all packaging materials out of the reach of children to prevent possible choking or suffocation.

WARNING: Handle with care. Vitreous chinaware is glass-like with sharp edges if broken. Do not drop, handle roughly, or overtighten bolts.

Warranty

LIMITED LIFETIME WARRANTY

Our products are manufactured with superior quality standards and workmanship and are backed by our limited lifetime warranty.

Our products are warranted to the original consumer purchaser to be free of defects in materials or workmanship. We will replace FREE OF CHARGE any product or parts that proves defective.

Pre-Installation

Compare all parts with the Hardware Included and Package Contents lists in this manual. Check the surface of the sink for any flaws or damage, including dents, bends, bumps, or scuff marks. If any damage is noticed or parts are missing, do not proceed with the installation. Contact the Customer Service Team.

Packing list

Part	Item	Quantity
A	Sink	1
B	Mounting clip set	4
C	Use and care manual	1
D	Cut template	1

HARDWARE INCLUDED

IMPORTANT: We strongly recommends that this product be installed by a licensed plumber. Ensure that installation complies with applicable plumbing and building codes.

TOOLS REQUIRED

Goggles

Drill

5/16" diamond drill bit

Tape

Ruler

Sealant

Flat Shovel

Philips screwdriver

Flat screwdriver

Wrench

Pipe Wrench

Epoxy

NOTE: The template (B) is to be used as a guide for cutting the sink opening in the countertop, if one does not exist.

To avoid possible damage to the cabinet, cut the counter top before installing it to the cabinet.

Installation

1 Installing the anchors

NOTE: It is recommended this be done by a professional.

- Using the template (B) as a guide, mark the four hole locations for the mounting hardware on the countertop.
- Using a 5/16 in. diamond bit, drill a 1/2 in. deep hole in each location.
- Clean the holes and apply quick set epoxy.
- Place one threaded knurl (BB) into each hole, and allow the epoxy to cure for the amount of time as directed by the epoxy manufacturer.

2 Applying the sealant

- Make sure the surface to be sealed is clean, dry, soap free, oil free, and grease free.
- Apply a continuous bead of quality sealant around the top side of the sink (A) rim near the edge.

NOTE: It is recommended to practice the proper positioning two or three times before applying sealant.

3 Mounting the sink

- With the countertop positioned upside-down, center the sink (A) over the cutout.
- Firmly press the sink (A) onto the countertop, and immediately wipe off excess sealant.
- Attach the undermount clips (AA) to the threaded knurl (BB) in the countertop using the machine screws (CC) and washers (DD) to hold the sink (A) in place.
- Allow the sealant to set for 30 minutes before proceeding.
- Flip the countertop right-side up, and install it onto the cabinet.

4 Installing the plumbing

Install the drain (not provided) according to the manufacturer's installation instructions.

Install the waste system, faucet, and the water supply (not provided) according to the manufacturer's installation instructions. Check for leakage.

CAUTION: Do not overtighten the drain assembly. This may cause the bowl to forcefully crack during installation or at some time in the future.

Care and Cleaning

For best results in caring for your sink, we suggest the following:

- Clean the outside surface with mild soap, warm water, and a soft cloth.
- On stubborn stains, use a powdered detergent and damp sponge or nylon scouring pad.
- Never use abrasive scouring powders, cleansers, or pads because they will scratch, damage, and dull the surface.
