Biometric Setup Sheet - Activity Map

Understand human behavior with our Heat Map and Path Tracking data analytics.

- Open Amaryllo App
- Tap on Activity Map

Heat Map technology analyzes an area over a period of time to calculate which spots are most commonly occupied by people.

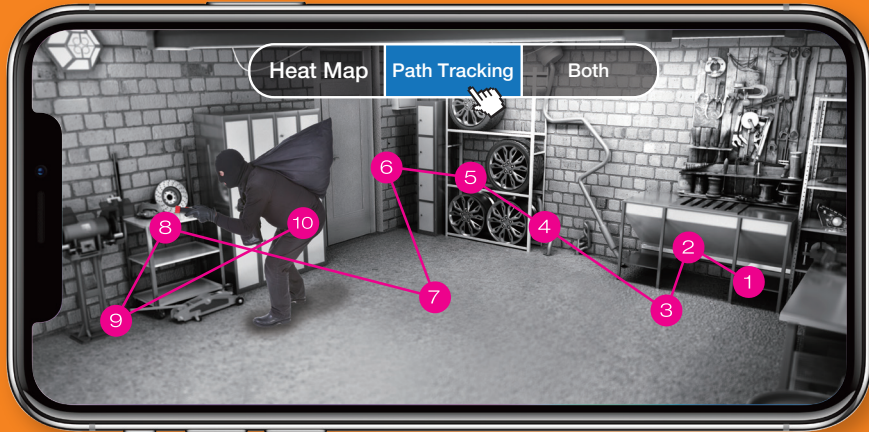

The data is displayed with a color gradient, red indicating most visited and blue indicating less visited.

The Heat Map image is updated every hour and data is refreshed by the end of the day.

Path Tracking technology uses picture frame analytics to record recent human activity and compile path data.

The app is then able to display the last ten spots where a human has been detected around your home.

If a thief breaks into your house, you can use these features to see where they lingered the most, as well as their entry and exit points.

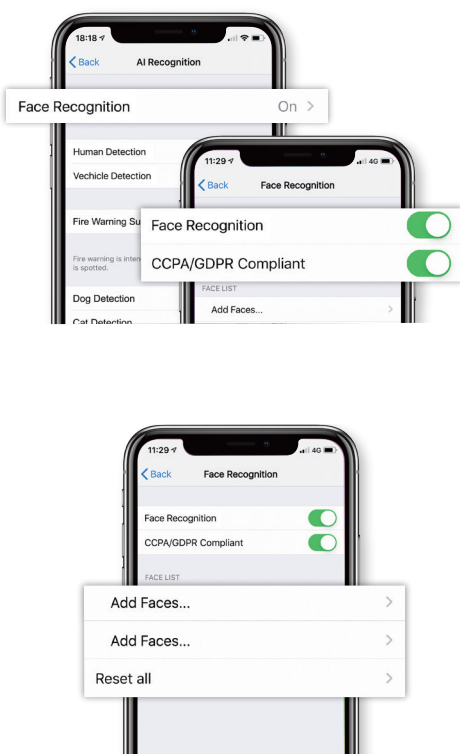

Biometric Setup Sheet - AI Recognition

Feel secure with our innovative biometric camera technologies

- Open Amaryllo App
- Tap on Settings

Enable Face Recognition

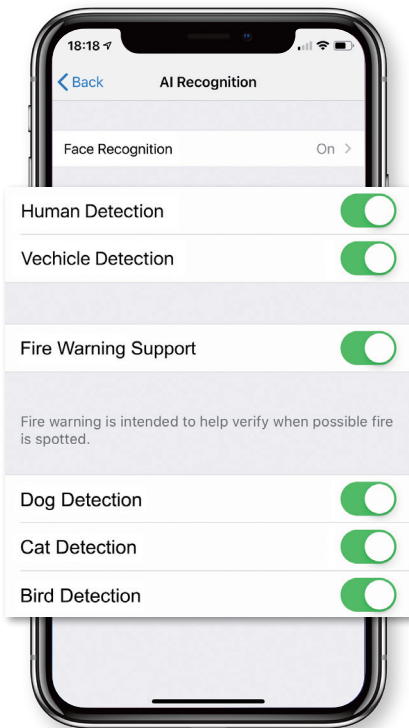

Face Recognition allows your camera to recognize faces and notify you via the App.

Each face recognized by Amaryllo cameras can be blurred in order to comply with CCPA and GDPR requirements.

Add Faces

Amaryllo allows you to save and name up to 10 faces (based on your subscription plan). Once a person is spotted, you will receive a notification.

If you want your Amaryllo camera to learn new faces, tap the label "Add Faces" and follow the instructions.

Enable Other AI Recognition features

Once enabled, you will receive push notifications whenever a Human, Vehicle or Pet is recognized by your Amaryllo camera.
