SAFETY INFORMATION &WARNINGS

When using any electrical appliance, basic safety precautions must be followed in order to reduce the risk of fire, electrical shock and/or injury to persons or property. Be sure to read all instructions before using this appliance and observe the following safety tips:

ATTENTION: CHILD ENTRAPMENT RISK!

To prevent the risk of child entrapment, do not allow children to operate, play with, or crawl inside the unit. If the unit will not be used for an extended period of time, remove the door and leave the shelves in place so that children cannot crawl inside. Also remove the door when disposing of the unit.

⚠ Shock Hazard –Electrical Grounding Required

- Never attempt to repair or perform maintenance on the unit until the electricity has been disconnected.
- Never remove the round grounding prong from the plug and never use a two-prong grounding adaptor.
- Altering or cutting of power cord, removal of power cord, removal ofpower plug, or direct wiring can cause serious injury, fire, loss of property and/or life, and will void the warranty.
- Never use an extension cord to connect power to the unit.
- Avoid operating this beveragecooler in excessively moist or humid environment

!\text{Important Precautions:

- . Do not lift unit by door handle.
- · Never install or operate the unit behind closed doors.
- Failure to clean the condenser every six months can cause the unit to malfunction.
- Allow unit temperature to stabilize for 24 hours before use.
- · Do not block any internal fans.
- Keep the wine cooler away from hazardous materials or combustible/flammable substances.
- Use only genuine supplier's replacement parts. Imitation parts can damage the unit, affect its operation or performance, and may void the warranty.

- 2. Stainless steel door
- 3. wine cooler foot

- 4. Door hinge
- 5. Interior LED light
- 6. Shelf

ASSEMBLY & INSTALLATION

Before connecting the appliance to a power source, let it stand upright for approximately 2 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.

This wine cooler is a freestanding unit and should not be built in to surrounding cabinetry. Allow for proper air clearance around the cooler. The recommended clearances are as follows:

Sides: ¾" (19 mm) | Top: 4" (100 mm) | Back: 2" (50 mm)

Before operating your beverage cooler for the first time, follow these steps:

- 1. Clean the interior surface of the unit with lukewarm water and a soft cloth.
- Place the cooler on a level surface that will be strong enough to support the unit when it is fully loaded. To level your cooler, adjust the front feet located at the bottom of the unit.
- 3. Install the cooler away from direct sunlight and heat sources such as stoves, heaters, or radiators. Direct sunlight may affect the unit's acrylic coating, and nearby heat sources can increase electrical consumption. Extreme cold or hot ambient temperatures may also prevent proper performance.
- 4. Once the cooler is plugged in, let the beverage cooler run for at least 30 minutes. Do not change the temperature or adjust any settings at this time.

OPERATING YOUR WINE COOLER

t is recommended vou install the wine cooler in a place where the ambient temperature is between19°C-24°C (66°F-75°F). If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected. For example, placing your unit in extreme cold or hotconditions may cause interior temperatures to fluctuate. The range of 40°F-65 (5°C-18°C) manot be reached.

Control Panel

(I) ON/OFF:

Press and hold the ON / OFF control button for 5 seconds will shut down the appliance but still power on, only the on/off icon will light up.

INSIDE LIGHTING:

The cooling zone has an interior light. Press once the light control button will switch between different colors and off, the light color switch cycle sequence is in white, blue, amber color and off.

[+] BUTTON: To increase the temperature by 1°C or 1°F

[-] BUTTON: To decrease the temperature by 1°C or 1°F

Control panel:

5 minutes without any operation, all the touch keypad light will turn off and the temperature will display normally. Touch any keypad can light up the button indicating light.

☆ NOTE

If the unit is unplugged, if the power is lost, or turned off, you must wait 3 to 5 minutes before restarting the unit. If you attempt to restart before this time delay, the wine cooler will not start.

When you use the wine cooler for the Arst time or restart the wine cooler after having been shut off for a long time, there could be a few degrees variance between the temperature you select and the one indicated on the LED readout. This is normal and it is due to the length of the activation time. Once the wine cooler is running for a few hours everything will be back to normal.

OPERATING YOUR WINE COOLER

Optimizing Performance

- To ensure maximum performance and efficiency, be sure to place your wine cooler in an
 area where there is proper air circulation. (See installation instructions above for proper
 clearances).
- For proper internal air circulation, do not overfill your wine cooler. When storing wine, keep them away from the rear wall. To allow free circulation of cold air, don't pack beverages too tightly on the shelves.
- Do not place the unit in direct sunlight.
- · Do not place heated food in your cooler.
- Do not store perishable food in your wine cooler. The unit's interior temperature may not be low enough to prevent spoilage.
- · Do not place heavy objects on top of the wine cooler.

Cleaning Your Cooler

How to clean your cooler:

- Unplug the cooler and remove anything inside.
- Wash the inside of the unit with a solution made of warm water and neutral detergent.
 Do not use abrasive cleaners.
- Use mild, soapy water to clean the unit's door seal.
- To ensure efficient operation, also thoroughly clean the back and bottom of the wine cooler.
- To clean the outside of the unit, use a mild detergent and warm water.

Moving Your Cooler

To move your cooler:

- · Remove anything stored inside.
- · Securely tape down all loose parts located inside the unit.
- · Turn the leveling feet up to the base in order to avoid damage.
- Tape the door shut.
- Be sure the cooler stays in an upright position during transportation.

Problem	Possible Causes	Solution
The wine cooler	The unit may be plugged in using a different voltage.	Check if using the wrong voltage.
does not cool.	The circuit breaker may be tripped or there is a blown fuse.	Reset the circuit breaker or check for a broken fuse.
	The external environment may require a higher setting.	Lower the temperature of the cooler.
The wine cooler is not cold enough.	The cooler may be placed too close to a heat source.	Keep the cooler away from direct sunlight or other heat sources.
	There is insufficient ventilation.	Place the beverage cooler in an area with proper ventilation and clearances.
	The door is not completely closed or the door seal is not working properly.	Close the door tightly. Do not open the door frequently and do not keep the door open for extended periods of time. Replace the seal on the door if necessary.
The wine cooler	The unit is not leveled.	Adjust the unit's feet and ensure the product is level.
seems to make too much noise.	There is insufficient ventilation. The unit is too close to a wall or another surface.	Allow sufficient clearance around the unit.
An interior red light is flashing.	The set temperature is too low.	Adjust the set temperature so that it is higher than the wine cooler's interior temperature.
Frost is building up in the unit.	There is excess humidity or the interior temperature is too low.	Turn off the beverage cooler, unplug it, and remove the frost buildup manually. Reconnect the power once the ice has thawed.
