

CARE INSTRUCTIONS

Most metal outdoor furniture is finished with paint, varnish, or powder coating to prevent rust. While aluminum does not rust, it can oxidize (causing pitting and dulling the finish). Maintaining your furniture will extend its life and make it easier to clean.

- Wash all frames with a solution of mild soap (such as dish soap) and water.
- Rinse with clean water and dry with a soft, absorbent cloth towel to remove dirt buildup.
- DO NOT clean with abrasive materials or solvents to avoid scratching or damaging your set.
- Frames can be treated with a liquid wax for maximum protection against UV rays and/or salty, damp air.
- Store furniture in an upright position to prevent water from building up in the frames, as this can cause corrosion and freeze damage in cold climates.
- Consider covering your furniture when not in use for long periods and during inclement weather.
