## at High Speed

|                                                     |                                                            |                                                                      |
|-----------------------------------------------------|------------------------------------------------------------|----------------------------------------------------------------------|
| Airflow<br><b>5,422</b><br>Cubic Feet Per<br>Minute | Electricity Use<br><b>63</b><br>Watts<br>(excludes lights) | Airflow Efficiency<br><b>86</b><br>Cubic Feet Per<br>Minute Per Watt |
|-----------------------------------------------------|------------------------------------------------------------|----------------------------------------------------------------------|

Compare: 49" to 60" ceiling fans have airflow efficiencies ranging from approximately 51 to 176 cubic feet per minute per watt at high speed.

**Money-Saving Tip:** Turn off fan when leaving room.
