Assembly Instruction

10x12ft Cedar Framed Hardtop Gazebo

Three or more people are required for assembly

The following tools are not included and needed for assembly

Note:

- 1. The gazebo come with 4 carton boxes.**
- 2. Wearing protective gloves is recommended.**
- 3. Do not fully tighten screws prior to complete assembly.**

Before You Start

-  Please read all instructions carefully.
-  Retain instructions for future reference.
-  Separate and count all parts and hardware.
-  Read through each step carefully and follow the proper order.
-  We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
-  Always place the product on a flat, steady and stable surface.
-  Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

Care and Maintenance

1. Our steel components for garden accessories and furniture are treated with rust inhibiting paint that protects it from rusting. However, due to the nature of steel, surface oxidation (rusting) will occur once these protective coatings are scratched. This is not a defect and thus not covered by the warranty.
2. To minimize this condition, we recommend care when assembling & handling the product to prevent scratching the paint. Should any scratching or damage occur, we recommend immediate touch-up with rust inhibiting paint.
3. Surface rust can also be easily removed with a very light application of common cooking oil. If surface oxidation (rusting) occurs and if no measure is taken to prevent this, the oxidation may start dripping on to deck or patio and caused damaging stains, which may be difficult to remove. This can be prevented if the above-mentioned measures are taken to keep the product from oxidizing.
4. Use damp cloth to wipe off the stains as quickly as possible.
5. If necessary, wash with a mild solution of soap and water; rinse thoroughly and dry completely.
6. Periodically check and ensure that all bolts are well-tighten during use.
