### Model A TWO FUNCTION SHOWER SET OUTLETS INSTALLATION

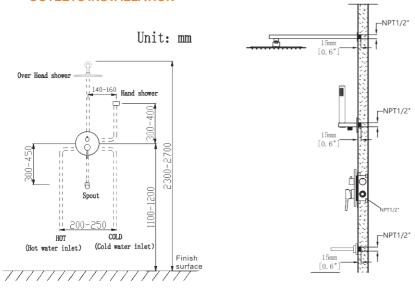

# 

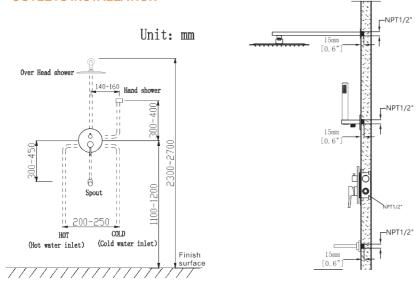

The installation dimensions are for reference only, and can be installed according to actual usage requirements.

The installation depth of ceiling rod is about 15mm, The installation depth of shower seat is about 15mm. The main body installation depth is on the following detail description

### Model C THREE FUNCTION SHOWER SET OUTLETS INSTALLATION

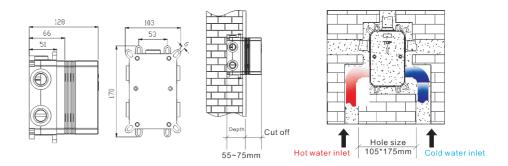

### Model D THREE FUNCTION SHOWER SET OUTLETS INSTALLATION

The installation dimensions are for reference only, and can be installed according to actual usage requirements.

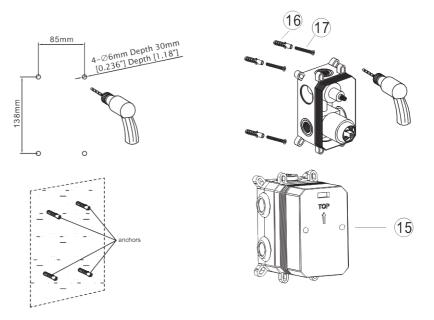

The installation depth of ceiling rod is about 15mm, The installation depth of shower seat is about 15mm. The main body installation depth is on the following detail description

# Model A & C & D MAIN BODY VALVE INSTALLATION

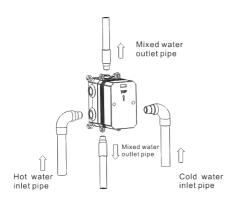

According to the basic size of the concealed box, use a special tool to open the main hole in the solid wall, As shown in the figure, the distance between the surface of the wall after the final treatment and the bottom surface of the opening should be considered to be  $55\sim75$ mm.

According to the size of installation to install the anchors to the wall, then use (60) Valve gasket spare partsthen install the (5) Main body

Please note that the level meter should be parallel, otherwise the panel cannot be installed Pay attention to the length and width of the screw position before marking

### ◆ Model A & C & D TWO-FUNCTION MAIN CONNECTING PIPE SCHEMATIC DIAGRAM

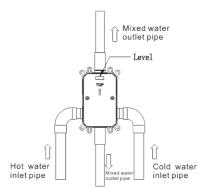

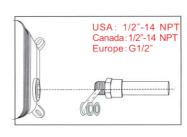

As shown in the figure, the inlet and outlet pipes are pre-buried, pay attention to the correct direction of installing the pre-buried box, and make sure that the mark TOP on the top of the installation box is facing upward.

# Model A & C & D 2 WAY FUNCTION MAIN BODY CONNECTING PIPE SCHEMATIC DIAGRAM

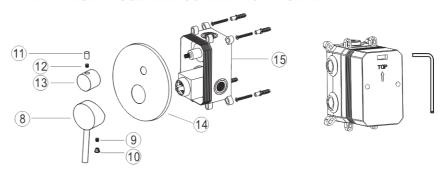

Warning:must install hot water and cold water inlet strictly as instructions.

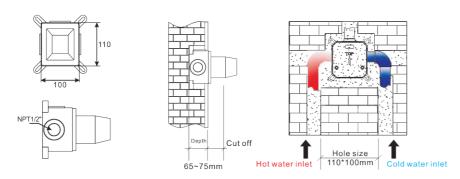

Install the hot and cold water inlet pipes, Shower head and hand shower holder pipes. Turn on the water source to test whether the left and right inlet pipes are tightly connected without leakage. After the test, adjust the flow switch to be on to test whether the mixed outlet pipe. The connection is tight and there is no leakage.

### Model A & C & D MAIN BODY ASSEMBLY SCHEMATIC DIAGRAM

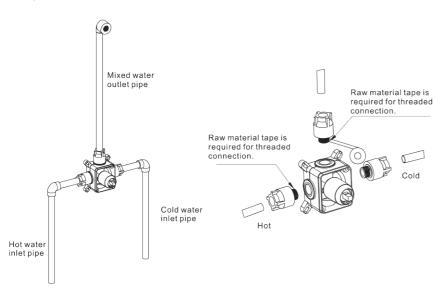

# Model B 1 WAY FUNCTION MAIN BODY CONNECTING PIPE SCHEMATIC DIAGRAM

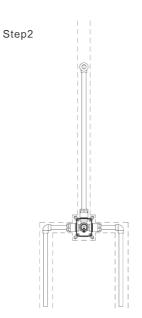

According to the basic size of the concealed box, use a special tool to open the main hole in the solid wall, As shown in the figure, the distance between the surface of the wall after the final treatment and the bottom surface of the opening should be considered to be  $65\sim75\,\mathrm{mm}$ .

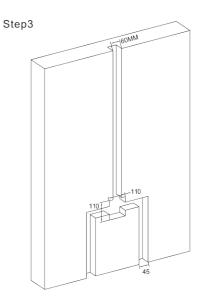

### Step1

As shown in the figure, the inlet and outlet pipes are pre-buried, pay attention to the correct direction of installing the pre-buried box, and make sure that the mark TOP on the top of the installation box is facing upward.

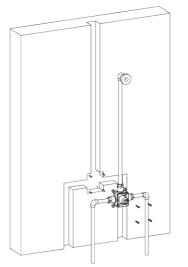

Draw the outline of the connected main body and tubes with a marking pen when place them against the wall, and then prepare for the grooving.

Drill the wall according to the size, and then groove.

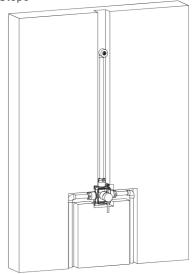

### Step4

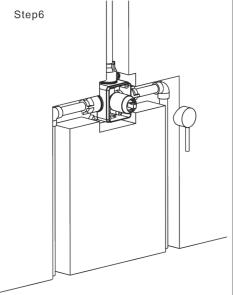

Punch the rubber particles into the wall, and fasten the main body to the wall with screws.

5. Turn the handle and the water divider wheel on the product, then plug the thread of the water in and out with a plug, test the faucet, and there is no water leakage.

### Step5

Adjust the handle and the divertor on the product, plug the thread of outlet to test the faucet, ensure there is no leakage.6. If the water test is no problem, remove the handle and divertor.

If the water test is no problem, remove the handle and divertor.

# Remember to put the protective cover back before

Remember to put the protective cover back before placing the tiles, and tighten the screws to prevent damage to the surface of the main body.

### Step8

Use sealing tape to seal the thread position needed. After tile fixing, install the handle, showerhead, panel, decorative cover and divertor.

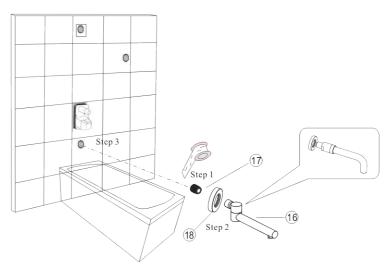

### Step9

The product is a single-function concealed shower. When the handle is opened, the showerhead will spray water, and rotate left and right to adjust the hot and cold water.

### ◆ Model C & D INSTALL THE TUB SPOUT(IF HAVE)

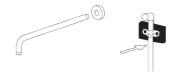

Step1: Connect the copper connector to the bathtub spout and wrap it with waterproof tape.

Step2: Install the round decorative cover.

Step3: Rotate the bathtub spout to connect with the internal thread on the wall.

### INSTALLATION OF RAIN SHOWER ARM

Step 1

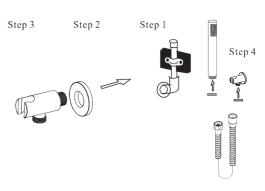

Step1.Screw the thread into the water pipe inside the wall.
Screw the main body into the thread.
Step2. Connect the rain shower head to the arm.

Step2. The rain shower head connects to the arm.

### MODEL A & C & D SHOWER HOLDER INSTALLATION

Step1: Install the decorative cover on the shower seat.

Step2. Screw the main body into the thread.

Step3. Connect handle holder with hose and handle shower.

### **◆ CARE AND MAINTENANCE**

In order to keep the mixer surface bright, please clean the mixer regularly.

Rinse faucet with clean water and wipe with soft cotton cloth.

Avoid suing cleaning powder, harsh cleaning chemicals, brushes, and cloth with coarse surface to prevent scratching and corrosion.

Do not use acid cleaner to clean the faucet as it may cause surface corrosion of the faucet. If the faucet comes into contact with harmful acid substances, please rinse it with water immediately.

### • IF A LARGE-SCALE CLEAN-UP IS NECESSARY, FOLLOW THESE PROCEDURES:

- 1:Use clean water and soft cloth to remove dirt on the surface as much as possible.
- 2:Use one of the following cleaners to remove dirt on the surface
- Mild liquid cleaner.
- Colorless glass cleaner, powder cleaner which does not have abrasive function and can be dissolved completely.
- Polish liquid which does not abrasive function.
- 3:After cleaning, remove the cleansing agent with clean water completely and wipe with soft cotton cloth.
