

Makers of America's Finest™

# GOOSE SCRAM™

## GRANULAR REPELLENT

## EASY TO APPLY INSTRUCTIONS

### FOR BEST RESULTS: MUST USE A SPREADER

#### ① SET YOUR SPREADER SETTING TO 80% OPEN.

Each spreader has holes that dispense product. Because of the variety of spreader styles - look at your spreader's holes' open & close. Typically left is lowest & right is wide open. Middle point is 50%. You may need to adjust for proper coverage as spreader condition, rate of walk are just some of the variables that can affect the rate of application.

**A 10 lb. bucket will cover approx.  
3,500 square feet. (ie. 35 ft W x 100 ft L)**

- ② Apply where the geese are eating and grazing. Then go beyond the area by 15 feet as they may travel beyond their normal area.
- ③ Repeat in 20 days. May have to reapply after heavy rainfalls. Do not place directly into water, such as ponds. Use around the waterfront edge as necessary. **FOR OUTDOOR USE ONLY.**

***Please Be Patient. While Goose Scram™ is fast acting, it may take several days for the geese to leave the treated area.***

## SCRAM COVERAGE

When used as directed the treated area will cover the square feet listed & give you the desired results! EPIC stands behind all our granular repellents with the industry's best **100% PERFORMANCE GUARANTEE!** For detailed information, visit our website at [epicrepellents.com](http://epicrepellents.com)
