

Care & Maintenance

- Protect furniture surface from hot items or extremely cold items.
- Clean the surface regularly - apply water with a mild soap solution and lightly scrub the surface as well as the underside, rinse with clean water and allow to air dry.
- Do not clean furniture with harsh cleaners, polish, abrasive material, bleach, or scouring products, as this will affect the finish.
- When moving furniture, always lift the unit. Do not push or drag it to avoid damaging the legs.
- If you need to put your furniture in storage for a long period of time do not store them in a damp basement or hot dry attic. Allow air movement around the furniture and do not stack anything on it.
