

Van Zyverden's
GLADIOLUS ACIDANTHERA

Acidanthera appreciates the warm weather of summer and are very easy to plant and grow. You can plant them all at once after the danger of frost has passed, or plant them bi-weekly for continuous flowers throughout summer. They are best planted in groups.

*Plant in groups
for maximum curb appeal*

Fragrant

Beautiful cut flower

About This Variety: Also known as Abyssinian Gladiolus, and recently re-classified as Gladiolus oallianthua Murielae. Fragrant and exotic looking, affordable and super easy to grow.

Growing Instructions: Choose a well-drained, sunny location. Planting them at their optimum depth will help anchor them against strong winds. Plant them in rows, circles or whatever makes for a nice display. Flowers will come in 70-100 days. In USDA zones 6 to 7, they will thrive as well if protected by a layer of mulch throughout the winter. They love to be fertilized.

Care Tip: Dig and store indoors for the winter in USDA zones 3-7.

Exposure: Full sun to partial shade

Height: Grows 30" tall

Spacing: Plant 3-4" apart, 3-4" deep

Hardy in: USDA zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
