3 POST DETERMINE TYPE OF POST NEEDED & QUANTITY

Post Type & Uses: Note: post should be installed 72-1/2" center to center

LINE POST

Pre-routed holes on opposite sides of the post. Used to connect fence panels in a straight line.

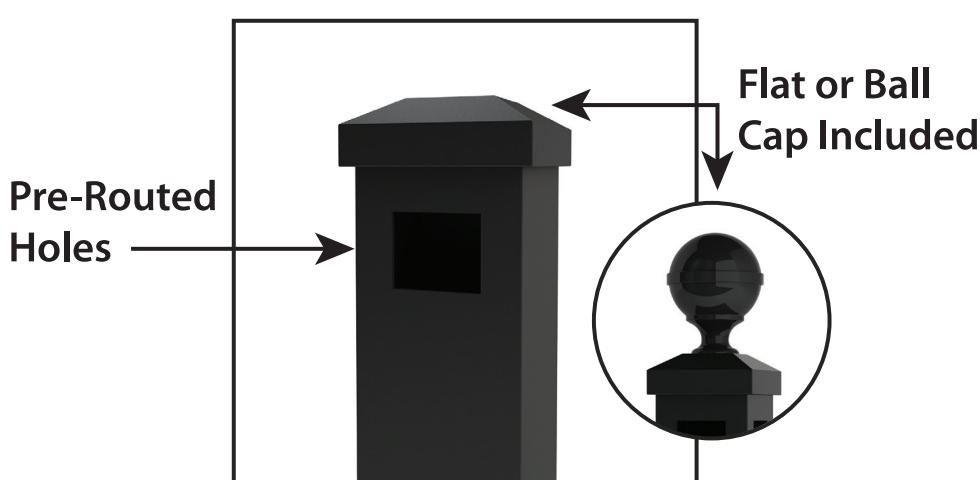

CORNER POST

Pre-routed holes on adjacent sides of the post. Used to connect fence panels at a 90° angle. 1 corner post is needed per 90° angle.

END/GATE POST

Pre-routed holes on one side of the post. Used to provide an end point and/or to support gate(s) in your fencing system. 2 end/gate posts are needed per gate.

*Deck mount sold separately
