◆ INSTALLATION CONDITION

1. Refer to the 《Standard Part List》 when unpacking ,
check all parts available .
2. Do not disassemble mixer body by yourself.
3. Connect inlet hoses to supply valves.
4. Make sure inlet pipes and supply valves have been
installed and cleaned, also ensure no impurities in
pipeline.
5. After installation , check all joints for leakages.
6. Suggest don't fit the faucet in the severely corrosive environments.

unit:mm

Hot water inlet

Hot water Inlet Cold water Inlet
Hole size 250mm*120mm

Depth 86mm*92mm

The depth of main body should be in the thickness range of wall tile

According to the basic size of the embedded box, use a special tool to drill the main hole on the solid wall. As shown in the figure, consideration should be given to the depth of the wall and the bottom base after final treatment. Take out the spirit level to install the embedded box and test whether the installation is parallel.

◆ MODEL: M6340
Digital display main body Installation Instruction

3 hole male thread to 3 hole female thread

Carefully take out panel (8) from body (1) and unplug the display cable. Don't scratch the panel and place it carefully. As shown in the figure, (1) the embedded box, fix on the wall with (7) screws, hole size (250mm*120mm), Depth (86mm*92mm), and then connect the two wires of the digital display. Attention: 2 hole male thread to 2 hole female thread, 3 hole male thread to 3 hole female thread, the direction should be correct, otherwise it will cause motor damage and do not display, and then install panel (8). Next install the (2) shunting valve, tighten it with (6) screws, and install (4) water distribution caps. Finally, install the (3) handle, tighten it with (5) screws, and install (4) water diverter cover.

As shown in the figure, the inlet and outlet pipes are embedded. Pay attention to the correct installation direction of the embedded box. Be sure to mark the top of the baffle upward and the vertical direction of the embedded box. The lower left connector is connected to the hot water pipe, the upper left connector is connected to the top nozzle, and the upper right connector is connected to the hand pipe.

Attention! Do not disassemble the product without professional guidance. Pictures are for reference only. All spare parts are subject to the actual product. When the water pressure is lower than 2bar and greater than 6bar, the digital display may not work

◆ **MODEL: M6502**

TWO-FUNCTION MAIN CONNECTING PIPE SCHEMATIC DIAGRAM

As shown in the figure, the inlet and outlet pipes are pre-buried, pay attention to the correct direction of installing the pre-buried box, and make sure that the mark TOP on the top of the installation box is facing upward.

◆ **MODEL :M6502**

2 WAY FUNCTION MAIN BODY CONNECTING PIPE SCHEMATIC DIAGRAM

Warning: must install hot water and cold water inlet strictly as instructions.

Install the hot and cold water inlet pipes, Shower head and hand shower holder pipes. Turn on the water source to test whether the left and right inlet pipes are tightly connected without leakage. After the test, adjust the flow switch to be on to test whether the mixed outlet pipe. The connection is tight and there is no leakage.

◆ **MODEL: M6001**

MAIN BODY VALVE INSTALLATION

Unit: mm

According to the basic size of the concealed box, use a special tool to open the main hole in the solid wall. As shown in the figure, the distance between the surface of the wall after the final treatment and the bottom surface of the opening should be considered to be 68~88mm.

As shown in the figure, the inlet and outlet pipes are embedded. Pay attention to the correct direction of installing the embedded box. Be sure to mark the top of the baffle upward, and the vertical direction of the embedded box. The lower left interface is connected to the hot water pipe, the upper left interface is connected to the top spray pipe, and the upper right interface is connected to the handheld pipe.

Please fix the ④ Main body to the wall then remove the plastic protective cover and install ⑤ Panel ⑥ handle.

◆ **MODEL:M6001
SHOWER HOLDER INSTALLATION
INSTALL THE HAND SHOW HOLDER**

Step1. Screw the thread into the water pipe inside the wall.
Step2. Screw the main body into the thread.
Step3. Rotate and fix the body with the special-shaped wrench.
Step4. Connect hand shower and the hose.

◆ **MODEL:M6001
BODY JET INSTALLATION**

Step 1.Wrap the threaded pipe of NPT1/2 with Teflon tape and screw it into the wall.
Step2.Cut off excess part with a saw.
Step3.Put on the decoration cap, then screw the massage shower in.

◆ **Installation of massage shower**

◆ **CARE AND MAINTENANCE**

In order to keep the mixer surface bright , please clean the mixer regularly.

Rinse faucet with clean water and wipe with soft cotton cloth.

Avoid suing cleaning powder , harsh cleaning chemicals, brushes,and cloth with coarse surface to prevent scratching and corrosion.

Do not use acid cleaner to clean the faucet as it may cause surface corrosion of the faucet. If the faucet comes into contact with harmful acid substances, please rinse it with water immediately.

◆ **IF A LARGE-SCALE CLEAN-UP IS NECESSARY, FOLLOW THESE PROCEDURES:**

1:Use clean water and soft cloth to remove dirt on the surface as much as possible.

2:Use one of the following cleaners to remove dirt on the surface

Mild liquid cleaner.

Colorless glass cleaner, powder cleaner which does not have abrasive function and can be dissolved completely.

Polish liquid which does not abrasive function.

3:After cleaning, remove the cleansing agent with clean water completely and wipe with soft cotton cloth.
