

Smart Light Bulb LB3 User Manual

Read before installing or using this product. Keep this guide for future reference.
Visit Contixo.com for literature updates!

Download and Install the Xodo Smart APP

Download and install the APP. It can be also be found by searching "XODO Smart" by Contixo Inc. in the App Store (for IOS) or Google Play Store (for Android).

Xodo Smart

Open the APP

The welcome screen will appear and then you will be asked to login or register a profile.

1. Register an account by entering your email address and setting up a profile or logging in with an existing account.
2. Configure your WiFi by choosing your network and provide password credentials. The APP supports 2.4 GHz WiFi networks (5 GHz network is not compatible).
3. Additional members can be added later in the Family Settings to allow others to control smart products.

Adding Devices

When detecting devices manually, power on the device and confirm the indicator light is blinking rapidly. (Hold the reset button for 5 seconds) Once you confirm the smart device is ready, press the “Confirm indicator rapidly blink” button. Continue on to the next step. Pressing the “Help” button will offer some troubleshooting guidelines to follow.

Detecting Device

When detecting devices manually, power on the device and confirm the indicator light is blinking rapidly.

- Once you confirm the smart device is ready, press the “Confirm indicator rapidly blink” button. Continue on to the next step.
- Pressing the help button will offer some troubleshooting guidelines to follow
- If the light bulb is not flashing, try turning the light bulb on and off three times then leave on.

Connect to a WiFi network

The next step to connect the smart device is to connect to a WiFi network.

- If the proper network is not listed on this page, select the “Change Network” link to see a list of available networks.
- Enter the password next to the lock icon
- Press Confirm to continue

Connecting

The Connecting screen will appear, it will usually register within by approximately 30% range. The Device found will checkmark green, then Initializing device will complete. After connecting process completes it will continue on toward the next screen.

Confirmation Screen

The smart device is added once they are communicating on the same network.

- You can rename the smart device by clicking on the pencil icon.
- You can specify the location.
- Press the Completed button at the bottom of screen to continue to next step.

Home Screen Updated

Now that your device has been added, it will show on the home screen along with all other paired Xodo Smart Products. Now you are all set.

White Mode

The White Mode screen will allow basic controls over the standard lighting mode.

- Bright controls the brightness
- Color Temp allows the light to take different moods

Color Mode

Color Mode allows additional controls over the lighting

- Saturation will give more brilliance to the lighting
- Bright will allow control over light intensity

Scene Mode

Scene Mode allows additional controls for preset lighting

- Each light mode will provide different lighting effects to choose from.

Schedule

Add schedules to give an automated response from the smart light.

- Program times to turn the bulb on or off
- Set the recurrence of the schedule

Left Time

This will keep the bulb in ON position for a specific duration of time.

1. Click "Left time".
2. Select the switch that needs to be set.
3. First configure the hours (left).
4. Next configure minutes (right).
5. Click "OK" to save the settings.

Configure the Light Bulb Settings

Different features can be adjusted from the menu button on the upper right hand button “” on the APP.

1. Device Name can be changed as desired.
2. Device Location can set the location of the power strip in your home.
3. Check Device Network allows to check the network connection status.
4. Add Members to be able to control the device in the Share Device setting.
