

Prior to installation, please review the instruction manual located inside the product packaging.

Cleaning and Maintenance

- Remove loose dirt by sweeping or using a vacuum cleaner that is suitable for hard floors.
- For ongoing maintenance cleaning, use only our Add2 laminate cleaner.
- Polishes and cleaners with care additives such as wax, oil, etc. are not suitable for treating the laminate flooring surfaces. The laminate flooring should not be polished.
- Footmarks and dirt can be wiped off with a well-wrung out, drip-free cloth.
Avoid standing water on the surface under all circumstances.
- Take special care with flowerpots, vases etc. Use drip tray on the laminate flooring.
- Stubborn soiling must be treated selectively and removed using a suitable cleaning spray or acetone.
Do not apply additional sealants on the laminate flooring.
- **Warning!** Protect your flooring against scratches and indentations.
Use a sufficiently large mat to trap dirt in enhanced areas.
- Wooden, metal or plastic feet on furniture must be fitted with felt pads. Only use office chairs with soft castors (DIN 12529) or place a proprietary protective mat underneath the chair. If these instructions are followed, you will maintain the value and good looks of your laminate flooring and preserve your full rights under warranty.
