# PENNINGTON GRASS SEED

## GENERATIONS OF TRUST.

At Pennington, our relationship with the grass seed we sell starts long before your seed is grown. While most grass seed companies buy their seed on the open market, we are the only major grass seed company that works directly with a network of dedicated growers.

Built on decades of trust and integrity, our relationships with seed growers and their families now span multiple generations. Our legacy of working directly with farmers to bring you the finest grass seed possible helps ensure their success and ours. At Pennington, we know our seed and the farmers who grow it. From field to final product, that's the Pennington way.

## IS ANNUAL RYEGRASS THE RIGHT SEED FOR YOUR LAWN?

Annual Ryegrass is known for fast establishment and quick color. If you need temporary support for a permanent northern lawn or temporary winter color for a southern lawn, this annual grass is an ideal choice.

## 4 EASY STEPS FOLLOW THESE INSTRUCTIONS TO WOW YOUR NEIGHBORS

EN CUATRO PASOS SENCILLOS: Siga estas instrucciones para impresionar a sus vecinos

STEP 1

NEW LAWNS

STEP 2

OVERSEEDING

STEP 3

APPLY SEED

STEP 4

WATER

**PREPARE**

**FOR BARE SPOTS/NEW LAWNS:**  
Remove debris, then rake the soil to loosen and smooth the top layer.  
PARA ZONAS CON HUECOS O CÉSPED NUEVO: Retire los desechos y luego rastille la tierra para aflojar y suavizar la capa superior.

**FOR OVERSEEDING/THIN AREAS:**  
Start by mowing existing grass as short as possible followed by removing debris. Then rake the soil to loosen and smooth the top layer.  
PARA RESIEMBRA O ZONAS DELGADAS: Corte el césped existente lo mas corto sea posible y elimine los desechos. Luego, rastille la tierra para aflojar y suavizar la capa superior.

**APPLY FERTILIZER**

Apply a starter fertilizer at the manufacturer's recommended rate.  
APLIQUE UN FERTILIZANTE: Aplique la cantidad de fertilizante recomendada por el fabricante.

**APPLY SEED**

Spread the seed evenly using a drop, rotary or hand-held spreader according to the recommended spreader settings listed. Rake gently to work your seed & fertilizer into the soil.  
APLICACIÓN: Disemine las semillas de manera uniforme con un esparcador de caída, rotativo o manual, de acuerdo con las configuraciones recomendadas y enumeradas del esparcador. Rastille suavemente para que los semillas y el fertilizante germinen en la tierra.

**WATER**

Keep the soil moist by watering daily as needed until grass sprouts and reaches about 3" tall.  
RIEGUE: Mantenga la tierra húmeda al regar lo que sea necesario por día hasta que el césped brote y alcance alrededor de 3 pulgadas (7.62 cm) de alto.

## ADDITIONAL CARE TIPS

**1** Mow lawn when grass height reaches 3" tall

**2** Avoid removing more than 1/3 of the total grass blade length in any single mowing

**3** Hot summers can be stressful on your lawn; increase the mowing height during hot and dry periods to reduce stress on your lawn

**MOST IMPORTANTLY** - Don't kill the grass before it starts by using weed control (pros call it preemergent) on your lawn until your grass has reached its full mowing height of 3"
