LIMITED GROWTH & FLOWERING GUARANTEE

Garden State Bulb Co. (GSB) products have been grown with the utmost care and are of excellent quality. In order to obtain the desired end result, it is important that the instructions on our site and/or the accompanying (plant) instructions are followed. Given that we work with a natural product; we offer a 1 Year Limited Growth and Flowering Guarantee.

Garden State Bulb's obligation under this Guarantee is limited to troubleshooting, replacing the product, missing pieces or providing a gift certificate at Garden State Bulb's discretion. All products for which a Guarantee claim is made must be received by GSB and accompanied by sufficient proof of purchase (emailed or original physical store receipt, indicating the date of purchase).

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow directions, improper care, improper maintenance, or acts of nature, (such as damage caused by wind, lightning, snow, water, or ice), or damage caused by improper use of the products are not covered by the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

SPACING 3"-4" apart

DEPTH Plant 1-2" deep

MATURE HEIGHT 12" to 16" tall

BENEFITS Deer Resistant

Soil Preparation

**Great gardens start with great soil!
Soil preparation is essential for successful gardening.**

Healthy soil should have good tilth, nutrient content, and a viable population of beneficial microorganisms. We recommend using natural and organic ingredients to prepare the soil and maintain soil fertility. It is always a good idea to have a soil test to identify your soil type (sandy, loam, silt, clay) and find out your soil pH.

NOTE: It is important to store correctly until planting. Store in a cool, dry place with plenty of air circulation. Plant in spring as soon as ground has thawed and soil has warmed to 50°F and is workable. Usually 4-6 weeks after the last frost.

Onion Planting Instructions

- 1 Plant onions in early spring after the ground has thawed and there is no longer danger of frost.
- 2 Choose a location with well-drained soil that receives full sun. Loosen soil prior to planting.
- 3 Press onion sets 1-2" into the soil so that the point of the onion remains above the soil. Space sets 3-4" apart in a row with 12" between rows.
- 4 Continue to water regularly after planting and during dry periods. Onions are shallow rooted and need consistent moisture for flavorful good size bulbs to develop.

* **HARVESTING:** For fresh green scallions you can begin to harvest when the leaves are 12-16" tall throughout the spring. If you are growing for cooking onions allow them to ripen thoroughly. When you see the leaves wither just above the neck of the onion it is time to pull them.

About Onions

Garden State Bulb Stuttgarter onion bulb sets come directly from our farms and growers in the US. Each set is carefully hand-picked and checked for quality before shipment. Stuttgarter is an extremely versatile onion, with a mild and smooth onion flavor, round yellow bulbs and white flesh. Onion sets, or bulbs as they are sometimes called, are small starter onions best for early spring planting. They are ideal for use in most cooking dishes, grilling or salads. Stuttgarter is a long day onion and grows best in full sun with organically rich, well drained soil.

FREQUENTLY ASKED QUESTIONS

Q. How long can you wait to plant your onion sets?

A. Onion sets should be planted as soon as possible in early spring. We recommend within one week of receiving them.

Q. Where is the best place to plant onions?

A. Onion sets grow best planted in spring, with full sun and organically rich, well-drained soil.

Q. What should you not plant onion sets with?

A. Do not plant onion sets with beans, asparagus, sage or other onion family plants.
