Secured Parcel Drop Box

Black

Keep deliveries secure and organized with the Secured Parcel Drop Box, a durable solution designed for semi-covered or indoor environments. Made from powder-coated galvanized steel, this unit offers long-lasting strength and resistance to wear, making it ideal for building vestibules, covered mail drop zones, loading docks with overhead canopies, outdoor hallways or walkways with roof covers, parking garage areas, and under eaves or overhangs near building entrances. It's spacious enough to accommodate packages of various sizes while maintaining a sleek, compact footprint.

Each parcel drop box includes two keys for secure access and four expansion tubes for stable installation. Its hearty build ensures sturdiness and reliability, while the black powder-coated finish adds a clean, modern aesthetic suitable for both commercial and residential applications. Ideal for protecting parcels from tampering or misplacement, this drop box provides peace of mind and convenience in any covered or partially sheltered location.

FEATURES

Durable: Built from heavy-duty, powder-coated galvanized steel for long-term strength, corrosion resistance, and a refined appearance.

Secure: Includes two keys and a lockable front door to keep packages protected from tampering or unauthorized access.

Stable: Equipped with four expansion tubes for firm, secure mounting to the floor.

Spacious: Accommodates multiple packages or envelopes while maintaining a compact footprint for limited-space installations.

Modern: Sleek black powder-coated finish complements professional, residential, or commercial environments.

Low Maintenance: Smooth surfaces make it easy to clean and maintain, even in high-traffic areas.

Indoor/Semi-Outdoor Use: Best suited for covered or partially sheltered locations to protect against moisture and environmental exposure.

Versatile: Ideal for building vestibules, covered mail drop zones, loading docks with overhead canopies, outdoor hallways or walkways with roof covers, parking garages, and areas under eaves or overhangs.
