

DRYWALL SHIMS

Applications:

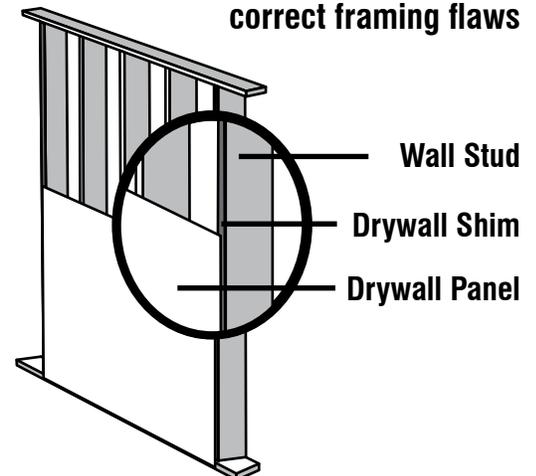

- ☑ Bowed or twisted studs
- ☑ Out-of-plumb corners
- ☑ Misaligned framing on windows & doors
- ☑ Used for floating butt-joints
- ☑ Corrects framing irregularities
- ☑ Allows a greater inset at the drywall joint
- ☑ Can be attached with screws or nails to framing members of each side of a butt-joint

Keep Dry

Drywall Shims added to correct framing flaws
