**RETAILER WHERE PURCHASED**

**DATE OF PURCHASE**

**ORDER NUMBER (IF AVAILABLE)**

## LIMITED GROWTH & FLOWERING GUARANTEE

---

Garden State Bulb Co. (GSB) products have been grown with the utmost care and are of excellent quality. In order to obtain the desired end result, it is important that the instructions on our site and/or the accompanying (plant) instructions are followed. Given that we work with a natural product; we offer a 1 Year Limited Growth and Flowering Guarantee.

Garden State Bulb's obligation under this Guarantee is limited to troubleshooting, replacing the product, missing pieces or providing a gift certificate at Garden State Bulb's discretion. All products for which a Guarantee claim is made must be received by GSB and accompanied by sufficient proof of purchase (emailed or original physical store receipt, indicating the date of purchase).

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow directions, improper care, improper maintenance, or acts of nature, (such as damage caused by wind, lightning, snow, water, or ice), or damage caused by improper use of the products are not covered by the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

# PLANTING & CARE INSTRUCTIONS

PLANTING TIME	Spring
BLOOM TIME	Summer
LIGHT	Full Sun, Partial Shade
SPACING	8'-10' apart
DEPTH	Even with soil level
MATURE HEIGHT	8' to 10' tall
BENEFITS	Great for Containers

## Soil Preparation

**Great gardens start with great soil!**  
**Soil preparation is essential for successful gardening.**

Healthy soil should have good tilth, nutrient content, and a viable population of beneficial microorganisms. We recommend using natural and organic ingredients to prepare the soil and maintain soil fertility. It is always a good idea to have a soil test to identify your soil type (sandy, loam, silt, clay) and find out your soil pH.

**NOTE:** It is important to store correctly until planting. Store in a cool, dry place with plenty of air circulation. Plant in spring as soon as ground has thawed and soil has warmed to 50°F and is workable. Usually 4-6 weeks after the last frost.

## Planting Instructions for Container

- 1 Carefully remove any packaging from the planter and select a container large enough for the plant (5-15 gal). Select a well-drained soil and fill bottom of the pot. When placing the plant in the pot, check that the existing soil level aligns with the top of the pot (add or remove soil if necessary).
- 2 Finish filling the pot with soil and tamp lightly. Place in a bright location that receives at least 6-8 hours of sunlight per day. Citrus trees do not tolerate hot or cold drafts, so keep away from air conditioning and heating vents.
- 3 Water regularly, but allow the soil to dry out to about 3 inches deep before watering again. Do not over water, but never allow the soil to completely dry out.

## Planting Instructions for In Ground

- 1 Carefully remove any packaging from the planter and select a place with the highest elevation and most available sunlight (at least 6-8 hours of sunlight per day).
- 2 Dig a hole twice the size of the root ball. Set the top of your root ball even with your ground level, and fill back the soil to the ground level and tamp.
- 3 Newly planted trees should be watered regularly for the first three months, if rains are inadequate. The soil should dry down between watering. Do not overwater.

## CONTACT US

# FREQUENTLY ASKED QUESTIONS

---

**Q. When planting lime trees in the ground what is the best place to plant?**

**A.** Lime trees grow best in partial sun to partial shade with well drained soil.

**Q. How tall do lime trees grow?**

**A.** Lime trees can grown 8 to 10 feet tall if planted in the ground.

**Q. How cold can lime trees tolerate?**

**A.** Lime trees are winter hardy in zones 8-11 outdoors. They should be planted in containers in zones lower than 8 so they can be brought inside if temperatures drop to 40°F or colder.
