Rugged. Affordable. Durable.

20TON GAS LOG SPLITTER - COMPACT INTEGRATED BEAM

Throw your most demanding log-splitting jobs at this Full Boar 20-ton gas log splitter and watch your woodpile grow! Engineered with a heavy-duty 45mm piston rod that significantly boosts cylinder strength for more powerful splitting, the solidly built push plate and sliding mechanism drive each log through with unstoppable force. This robust design not only delivers clean, effortless splits but also absorbs and withstands immense reactive forces, ensuring the piston rod remains perfectly aligned and free from bending or damage. Though many splitters claim 20 tons of force, Full Boar sets itself apart through meticulous engineering and a commitment to user confidence—building a machine you can rely on, split after split. Powered by a reliable 209cc engine and featuring a compact integrated beam-and-tank design, this affordable workhorse handles logs up to 20" long and 16" in diameter with unmatched power and durability. Rugged, portable, and built to keep splitting season after season.

FEATURES & BENEFITS

- ▲ Reliable 209cc engine with EPA certification provides powerful, compliant performance you can trust.
- ▲ An auto return control valve with adjustable detent saves time and effort.
- ▲ With an 8.5-second cycle time, it strikes the perfect balance between high-efficiency splitting and an ergonomic work rhythm.
- ▲ 10 In. Flat-free tires for hassle-free use and long-term reliability.
- ▲ Compact integrated beam-and-tank design saves space and makes transport easier.
- ▲ Specially designed wide-angle wedge splits logs more efficiently with less effort.
- ▲ The near-perfect 5° wedge angle is the result of meticulous engineering—precisely calculated to optimize force distribution and minimize log lift. This thoughtful design detail ensures a cleaner, more efficient split with every cycle.
- ▲ 10.5 GPM two-stage pump delivers faster cycle times and greater fuel efficiency.
- ▲ Heavy-duty 45mm piston rod enhances cylinder strength for more powerful splitting.
- ▲ Ergonomic handle design for easy and smooth transport.
- ▲ No Hydraulic oil included. Hydraulic Capacity 1.85 Gallon, type 10W AW32, AW22 and ISO 21
- ▲ Assemble needed
- ▲ Not Towable

SPECIFICATION

SPECIFICATION	
Model #	H5220FB
Splitting Force	20 ton
Engine	Full Boar
Displacement	209 cc
Gross Torque	9.15 lbf-ft / 2500 rpm
Starting System	Recoil
Fuel Capacity	0.68 Gallon
Engine Oil Capacity	16.9 oz
Log Capacity	20"
Log Diameter	16"
Forward Time	4.75 s
Reverse Time	3.92 s
Pump Size	10.5 GPM
Control Valve	Auto Return
Hydraulic Cylinder Bore	3.5"
Hydraulic Cylinder Stroke	19.5"
Hydraulic Rod Diameter	1.8"
Cylinder Cycle Time	8.5 s
Hydraulic Capacity	1.85 Gallon
Hydraulic Oil Required to Fill	1.45 Gallon
Hydraulic Oil Included	Not included
Towable	No
Open Operating Zone	Standard
Log Lift Table Attachment	No
Dimensions(LxWxH) Inches	56.3" x 26.4" x 35.4"
Rear Wheels	10"
Weight(lbs)	134 lbs
Warranty	3-2-1 Residential*, 90-Day Commercial
