

TRANZPORTER LADDERVATOR

Collapsible Carriage Platform

Available in two variants, the TP250 with a 250 lbs. capacity and the TP400 with a 400 lbs. capacity, The TranzPorter is a ladder hoist, or laddervator, designed to revolutionize the way materials are conveyed to challenging rooftops, expertly lifting materials to areas that are otherwise hard to access. This innovation significantly reduces the risks associated with manual lifting, safeguarding workers from potential injuries. For heightened versatility, an optional 4 ft. or 8 ft. track extension can be seamlessly integrated into the ladder hoist setup, enabling an impressive maximum height of 44 ft. The TranzPorter further offers three distinct motor options – the Lifan gas engine, Honda gas engine, or electric motor – catering to your specific preferences and requirements.

TRANZPORTER

Key Features

- 3 motor options (2 gas and 1 electric)
