

Technical Information

Stair Nose

The **Stair Nose** combines style and function to enhance the beauty of a staircase or step.

Surface Material: High Wear Resistant Aluminum Oxide Laminate Core Material: PVC

Installation Instructions

Step 1

Install the riser flush to the stair. Glue down flooring planks (for more details see manufacturers recommendations). Then, clean flooring and molding as directed below:

ainte

Roughen up surface that

comes in contact with glue

protect res

looring

- Roughen the surfaces with sandpaper (100-150 grit), sanding sponge or metal brush. For flooring, only roughen up area that will be covered (1.25" to 1.5").
- Degrease both surfaces to remove all traces of oil, grease, dust, and fingerprints by using a solvent such as methyl ethyl ketone (MEK), acetone or isopropyl alcohol.
- 4. Let both surfaces dry thoroughly before applying adhesive.
- Step 2

Turn stair nose over and roughen the inside surface of the molding to increase bond by means of 60 grit sandpaper, sanding sponge, or a metal brush. Then, gently peel the release paper all the way off the adhesive tape.

Step 3

Next, apply a generous bead of a *Premium Polyurethane Construction Adhesive* along the entire inside corner. Be sure to overlap the tape with the adhesive

Underside of molding generously covered with adhesive

Step 4

Touch the bottom of molding to the stair riser and carefully roll the stair nose in place. Make any final adjustments before you push the molding all the way down. Once it's in the final position, press down firmly with your hands and make your way down the entire stair nose. It may take 2 or 3 passes to set it firmly in place.

Step 5

Sub Floor

Stair Riser

Let the adhesive cure for at least 4 hours before any walking on it. For exposure to full traffic, wait 24 to 48 hours.

NOTE: Complete cure takes 48 hours.
