

The Weston Collection

Reimagine a backyard that you and your guests will love with modern furniture from the Weston collection. Available in both a 5-piece and 7-piece high dining set, the collection comes with a 60-in. slat-top gas fire pit table and either four or six wicker dining chairs, all at a trendy counter-height. Each piece is created using aluminum frames, coated with a high-performance dark brown finish that protects it from rust, scratches and harmful UV rays. The chairs have a tri-color weave, featuring tan, brown and light blue woven throughout. Thanks to construction using an open cell material that allows for water to disperse through the foam quickly, these reticulated foam seats are both quick-drying and incredibly comfortable. Finishing out the collection is the 60,000 BTU fire pit table. The gas fire pit is easy to use with push-button ignition and adjustable flame settings. When you're not in the mood for the cozy glow of a fire, use the burner cover to convert the fire pit into a regular dining table. Designed to last, rely on Agio to provide the most stylish dining sets under the sun.
