

Material

- Generator is constructed of insulated stainless steel, which maintains the temperature while ensuring the case is safe to the touch.

Technology

- Fast-Response® technology produces a luxurious steam shower in 60 seconds.
- Power Clean™ technology offers one-touch automatic cleaning and safe maintenance.
- Constant Steam produces steam at a consistent rate, which greatly minimizes temperature fluctuations.

Installation

- 550 cubic feet maximum volume rating for custom showering applications.

Required Accessories

K-5558 Tandem Steam Generator Control Kit

or

K-5549-K1 DTV+ Tandem Steam Adapter Kit

Recommended Accessories

K-5559 Small drain pan (Qty 2)

Installed component/s: Terminal block for electrical connections, and water inlet screen.

Loose component/s: 3/8 C x F Union, 1/2 C x F Union, and 3/8 C x M Union.

Codes/Standards

UL 499

CSA C22.2 No. 64

KOHLER® Steam Generator - Three-Year Limited Warranty

See website for detailed warranty information.

Minimum required access panel is
24" (610 mm) L x 15" (381 mm) H.

Allow for a minimum of 12" (305 mm) of
space around all sides of the steam generator.

Allow for the drain/spill pan.

KOHLER® drain pan (shown with support
blocks) sold separately.

Required Electrical Service

Two dedicated non-GFCI circuits required.

Steam Generator: 240 V, 60 A, 60 Hz

Steam Generator: 240 V, 60 A, 60 Hz

Technical Information

All product dimensions are nominal.

Electrical component rating: Steam Generator: 240 V, 60 Hz, 9000 W
Steam Generator: 240 V, 60 Hz, 9000 W

Notes

Install this product according to the installation
guide.

Steam room volume for this generator is 550
cubic feet (15.6 cubic meters).

For every foot of ceiling height over 8 ft (2.4 m),
use the next larger steam unit.

For optimum performance, the steam generator
must be installed within 25 ft (7.62 m) of the
steam head.

Recommended feed water quality should be:
Hardness: 60 ppm (3.4 gpg). Total Alkalinity: 150
ppm (8.8 gpTo ensure proper operation, the feed
water supply should be tested prior to operating
the steam generator. If feed water quality is not
within the specified limit, contact a reputable
water treatment company for treatment options.

Maximum inlet pressure is not to exceed 70 psi
(483 kPa).
