

Gibraltar Aluminum H-Molding, is used to cover butt joints of plywood soffit systems and siding. This molding covers the seams between plywood panels to provides a professional looking trim. The extruded aluminum cuts easily with a hack saw or a chop saw with a fine tooth metal blade. Gibraltar Aluminum H-Molding is paintable to match the soffit color.

Working above grade is inherently dangerous, be sure that proper fall protection measures are in place. When working with power tools and sheet metal, gloves and eye protection are absolutely required.

These installation guidelines are for use with typical or standard applications. It is always recommended to seek advice from a licensed professional, and to check with your local building inspector or building permit office for approvals and possible variations that may apply.
