

Plant Care Tips

Variegated Heart Leaf

Philodendron 'Brasil'

Sunlight

Philodendron Brasil grows best in medium to bright indirect light. It can tolerate lower light conditions, but its growth will be much slower and smaller.

Water

We recommend watering when the first two inches of soil feels dry.

Climate

Philodendrons prefer temperatures of 65 - 85°F.

Soil

Apply a balanced houseplant fertilizer at half strength once every 1 - 3 months.

Plant Story

Variegated Heart Leaf

Philodendron 'Brasil'

Philodendron Brasil are identified by their round, deep green leaves with mildly pointed tips and vivid white and yellow variegation.

Philodendron Brasil is a cultivar of the heartleaf philodendron and is a beautiful vining plant native to South America. Philodendron Brasil grows relatively quickly and can be hung as a beautiful basket or trained to climb trellises and moss poles. Its foliage is unique, featuring splashes of gold, cream, and light green.

Philodendron Brasil can tolerate medium to low light but is happiest in bright indirect light where it will produce larger foliage more quickly. Water when the first inch or two of soil feels dry. Philodendron Brasil are easy to care for and are wonderful plants to learn to propagate with, simply cut leaves below the node or root and place in water to begin the process.
